[Debates for the Digital Age](#) Danielle Sarver Coombs, Simon Collister, 2015-11-23 By evaluating the Internet's impact on key cultural issues of the day this book provides a comprehensive overview of the seismic technological and cultural shifts the Internet has created in contemporary society Books about Internet culture usually focus on the people places sites and memes that constitute the cutting edge at the time the book is written That approach alas renders such volumes quickly obsolete This provocative work on the other hand focuses on overarching themes that will remain relevant for the long term The insights it shares will highlight the tremendous impact of the Internet on modern civilization and individual lives well after specific players and sites have fallen out of favor Content is presented in two volumes The first emphasizes the positive impact of

Internet culture for example 24 hour access to information music books merchandise employment opportunities and even romance The second discusses the Internet's darker consequences such as a demand for instant news that often pushes journalists to prioritize being first over being right online scams and invasions of privacy that can affect anyone who banks shops pays bills or posts online Readers of the set will clearly understand how the Internet has revolutionized communications and redefined human interaction coming away with a unique appreciation of the realities of today's digital world for better and for worse **Meganets** David B. Auerbach, 2023-03-14 How the autonomous digital forces jolting our lives as uncontrollable as the weather and plate tectonics are transforming life society culture and politics David Auerbach's exploration of the phenomenon he has identified as the meganet begins with a simple startling revelation There is no hand on the tiller of some of the largest global digital forces that influence our daily lives from corporate sites such as Facebook Amazon Google YouTube Instagram and Reddit to the burgeoning metaverse encompassing cryptocurrencies and online gaming to government systems such as China's Social Credit System and India's Aadhaar As we increasingly integrate our society culture and politics within a hyper networked fabric Auerbach explains how the interactions of billions of people with unfathomably large online networks have produced a new sort of beast ever changing systems that operate beyond the control of the individuals companies and governments that created them Meganets Auerbach explains have a life of their own actively resisting attempts to control them as they accumulate data and produce spontaneous unexpected social groups and uprisings that could not have even existed twenty years ago And they constantly modify themselves in response to user behavior resulting in collectively authored algorithms none of us intend or control These enormous invisible organisms exerting great force on our lives are the new minds of the world increasingly commandeering our daily lives and inner realities Auerbach's analysis of these gargantuan opaque digital forces yield important insights such as The conventional wisdom that the Googles and Facebook of this world are tightly run algorithmic entities is a myth No one is really in control The efforts at reform to get lies and misinformation off meganets run into a brick wall because the companies and executives who run them are trapped by the persistent evolving and opaque systems they have created Bitcoin and other cryptocurrencies are uncontrollable and their embrace by elite financial institutions threatens the entire economy We are asking the wrong questions in assuming that if only the Facebooks of this world could be better regulated or broken up that they would be better more ethical citizens Why questions such as making algorithms fair and bias free and whether AI can be a tool for good or evil are wrong and misinformed Auerbach then comes full circle showing that while we cannot ultimately control meganets we can tame them through the counterintuitive measures he describes in detail **Say Hello** Carly Findlay, 2019-02-01 A forthright honest and rousing triumphal memoir from a woman who has to live with a highly visible different appearance due to a rare skin condition Say hello to Carly In fairytales the characters who look different are often cast as the villain or monsters It's only when they shed their unconventional skin that they are seen as good or less frightening

There are very few stories where the character that looks different is the hero of the story I've been the hero of mystery telling it on my own terms proud about my facial difference and disability not wanting a cure for my rare severe and sometimes confronting skin condition and knowing that I am beautiful even though I don't have beauty privilege. This honest, outspoken and thought-provoking memoir by award-winning writer and appearance activist Carly Findlay will challenge all your assumptions and beliefs about what it is like to have a visibly different appearance. Carly lives with a rare skin condition Ichthyosis and what she faces every day and what she has to live with will have you cheering for her and her courage and irrepressible spirit. This is both a moving memoir and a proud manifesto on disability and appearance diversity issues. Believe the hype by turns frank, funny and fearsome, Findlay's extraordinary memoir is an early contender for 2019's best Australian non-fiction. A powerful and moving invitation to examine the structures of privilege and dehumanisation that we so desperately need to address in this country.

Environmental Policy Science's Exploration for Innovative Data Nicholas Guehlstorff, 2025-08-04 This edited volume discusses the use of nontraditional data sources in environmental political research and its implications for policymaking. Researchers involved in natural resource investigations and pollution control analysis must be entrepreneurial in finding and utilizing data sets to answer pressing policy questions. To remain relevant, successful researchers must increasingly seek data beyond routine federal program assessments, fragmented local surveys and limited stakeholder interactions. This volume surveys current environmental research that draws on emerging data sources such as social media and political discourse. It poses critical questions about the potential of creative and innovative analytical approaches, particularly in contexts where policymakers have disregarded objective evidence-based social science on environmental challenges. By encouraging scholars to adopt new methods, research designs and data sources, this book offers valuable insights for researchers across the social and environmental sciences.
