 Mathematics in Berlin Heinrich Begehr, Helmut Koch, Jürg Kramer, Norbert Schappacher, Ernst-Jochen Thiele, 1998-07-21
 This little book is conceived as a service to mathematicians attending the 1998 International Congress of Mathematicians in
 Berlin It presents a comprehensive condensed overview of mathematical activity in Berlin from Leibniz almost to the present
 day without however including biographies of living mathematicians Since many towering figures in mathematical history
 worked in Berlin most of the chapters of this book are concise biographies These are held together by a few survey articles
 presenting the overall development of entire periods of scientific life at Berlin Overlaps between various chapters and
 differences in style between the chapters were inevitable but sometimes this provided opportunities to show different
 aspects of a single historical event for instance the Kronecker Weierstrass controversy The book aims at readability rather
 than scholarly completeness There are no footnotes only references to the individual bibliographies of each chapter Still we
 do hope that the texts brought together here and written by the various authors for this volume constitute a solid
