*Dimensions of Creativity* Margaret A. Boden, 1996 *Dimensions of Creativity* brings together original articles that draw on a range of disciplines from the history and sociology of science psychology philosophy and artificial intelligence to ask how creative ideas arise and whether creativity can be objectively defined and measured *Dimensions of Creativity* brings together original articles that draw on a range of disciplines from the history and sociology of science psychology philosophy and artificial intelligence to ask how creative ideas arise and whether creativity can be objectively defined and measured Margaret Boden and her colleagues Simon Schaffer Gerd Gigerenzer David N Perkins Howard Gardner Colin Martindale and Hans J Eysenck demonstrate that creativity requires not only challenging new ideas but their acceptance by some relevant social group Although some new ideas can arise as novel associations others are generated by exploiting structural features of an existing conceptual space Strong motivations often drive the creators and those who evaluate and perpetuate their work The seven essays although very different are complementary The book can serve as an up to date introduction to the study of creativity in various disciplines The many references provide a way into the relevant literature A Bradford Book

*Dimensions of Creativity* Donald J. Treffinger, 1996 *Creative Dimensions of Suffering* A. M. Ghadirian, 2009 *Creative Dimensions of Suffering* is an intriguing combination of psychiatry and spirituality that illustrates the power of creativity to treat suffering An examination of the lives of many famous artists who suffered including Van Gogh Tchaikovsky and Beethoven gives insight into how they dealt with their adversity through creativity Dr Ghadirian explores how various conditions such as alcoholism depression bipolar disorder and dementia can influence a person's creative impulse and how creativity and spirituality can help a person deal with trauma He describes the courage of many other well known figures such as Helen Keller and Christopher Reeve who were able to overcome their suffering and emerge victorious over daunting odds Finally drawing on principles found in the teachings of the Baha'i Faith Ghadirian attempts to explain suffering its place in human society and how it can lead us to a closer happier relationship with God as well as a better relationship with ourselves and with others Indeed many of those who have suffered the most have found new meaning through adversity and have emerged victorious

Agentic Hyper Personalized Dimensions Six Dimensions of Business Dark Data explores how generative AI Gen AI combined with agentic intelligence can transform raw enterprise data into hyper personalized actionable insights This book introduces a practical framework for building AI powered agent swarms that operate across six critical dimensions of business dark data empowering intelligent automation decision augmentation and strategic foresight at unprecedented scale In an age when data is underutilized organizations are overwhelmed by complexity latency and fragmentation Traditional analytics pipelines fall short in handling dynamic

environments and human centric demands. This book addresses this critical gap by detailing how autonomous Gen AI agents built on foundational disciplines of data engineering, data science, and machine learning can process, personalize, and operationalize hidden insights buried deep within enterprise systems. The six dimensions presented in the book form a cognitive and computational blueprint that guides the design, deployment, and evolution of agentic swarms. Each dimension focuses on a specific mode of intelligence such as contextual reasoning, emotional alignment, or real-time adaptive sensing, and shows how AI agents can specialize within each domain to maximize business impact. Readers won't just learn theory; they'll explore field-tested methodologies to deploy Gen AI-powered solutions at enterprise scale. From zoned data lakes and transformer models to swarm governance and consensus mechanisms, the book walks readers through the full life cycle of building intelligent systems that learn, evolve, and act with purpose. What makes this book essential and unlike others in the market is that the author is not writing from the sidelines. He is actively architecting and delivering these systems today with firsthand insight into what works, what fails, and what the future holds. The methodology presented blends system design, human-aligned AI, industrial automation, and trusted decision making, offering readers a rich and practical road map for AI-first enterprise innovation.

**What You Will Learn:**

- How to structure AI-powered agents across six interlinked cognitive and computational dimensions to effectively process dark data and deliver hyper personalized real-time business insights.
- Practical knowledge on how to orchestrate swarms of Gen AI agents governed by Councils that collaboratively manage complexity, detect emerging patterns, and operate autonomously in enterprise environments.
- The foundational and advanced skills required to implement generative AI and agent-based intelligence within large-scale multi-cloud and hybrid business ecosystems.

**Who This Book is For:**

This book is designed for professionals and practitioners operating at the intersection of artificial intelligence and business transformation. It is ideal for AI developers, data scientists, solution architects, enterprise engineers, and technical managers who are looking to move beyond the hype of generative AI and apply it meaningfully within industrial and enterprise-grade ecosystems.

Psychological Dimensions of Organizational Behavior Barry M. Staw, 1995

This comprehensive paperback book contains carefully chosen pieces that cover human behavior in organizations, from individual motivation to organizational processes. This anthology offers a broad mix of classic and recent articles. It covers emerging areas of interest such as business ethics and processes of creativity and change. This collection of readings is separated into four clearly defined dimensions: why and how we work, thinking and making decisions, interacting with others, social and group processes, and facing the future, creativity, innovation, and organizational leadership. An excellent resource for managers and other executives who need to know how to effectively lead their departments, this book provides the skills necessary for understanding the organization and how power, influence, and interpersonal relations affect their businesses. Includes articles by Edward E. Lawler III, David A. Nadler, Gary P. Latham, Edwin A. Locke, Steven Kerr, J. Richard Hackman, Greg Oldham, Robert Janson, Kenneth Purdy, Barry M. Shaw, Dennis W.
