Chapter 11: How Genes Are Controlled*Guided Reading Activities***Big Idea: Control of gene expression**

Answer the following questions as you read modules 11.1–11.11:

1. True or false: The expression of genes can be turned on or off. If false, make it a correct statement.

True

2. Match the following terms to their description: operator, operon, promoter, repressor, and activator.

A protein that binds to DNA and stimulates transcription: activator

Genes that serve a related function and the sequences that control them: operon

Place where RNA polymerase begins transcription: promoter

Protein that blocks the RNA polymerase from binding the DNA: repressor

DNA sequence that determines whether RNA polymerase binds the promoter: operator

3. A mutation in the bacterial gene that codes for the lac repressor creates a repressor that binds irreversibly to the lac operator. Briefly explain what effect, if any, this would have on the bacterium's metabolism of lactose.

The repressor would not detach from the operator, so the bacterium would be unable to metabolize lactose.

4. The process by which a cell becomes specialized in structure and function is called differentiation.

5. Briefly explain how the inactivation of the X chromosome in human females is an example of epigenetics.

One of the female X chromosomes is randomly inactivated by methylation. Future generations of cells born from this cell will have the same X chromosome inactivated. This process is an example of epigenetics.

Literate Lives Amy Seely Flint, 2007-11-09 Literate Lives: Teaching Reading and Writing in Elementary Classrooms invites readers to consider the complexities of the reading process in diverse settings. The text is designed to meet the challenges and needs of undergraduate and graduate teacher candidates in elementary education programs, helping them to have a better first year in the classroom experience. The text introduces teacher candidates to the notion that reading is a complex, multi-layered process that begins early in a child's life. Reading, by all accounts, is more than decoding symbols on a page. While this is one component of the reading process, it is important for teacher candidates to see a broader, more complete picture of reading. Given the role that reading plays in the elementary school curriculum, it is imperative that teachers have a well-developed understanding of the reading process and what it means to be a teacher of readers. Literate Lives: Teaching Reading and Writing in the Elementary Classroom covers the major theories and application strategies of the reading process, as well as current debates in the field, using a unique framework that builds upon the following themes: believing that literacy is based in social, cultural, and historical contexts; assuming an

inquiry stance being problem posers and wondering why using kidwatching Goodman 1985 as an assessment tool to make informed instructional decisions recognizing and using the multiple literacies that children bring to the classroom lingering and reflecting on one's decisions in light of what one knows and believes **Practical Strategies for Improving**

Instruction Karen D. Wood, 1994 Middle level teachers are unique not just by virtue of the level of students they teach but also by the ways in which they teach. This monograph emphasizes strategies that actively engage students of all ability levels. Promote collaboration provide for various levels of concrete and abstract thought and foster student inquiry. The monograph presents approaches to assessing reading and writing, cooperative learning, vocabulary development, reading comprehension and critical thinking and to other topics that are directly reflective of current research. It provides step by step procedures along with classroom examples in a convenient and serviceable format and its research based teaching strategies are applicable to all subject areas. The introduction offers an overview of the research on prevailing versus preferred instructional practices in middle schools and discusses what can be done to improve instruction in five basic areas: 1 approaches to teaching, 2 lesson planning and implementation, 3 classroom instructional resources, 4 instructional activities and arrangements, and 5 promotion of higher order thinking. The monograph emphasizes the following groups of strategies: 1 and 2 are concerned with assessing reading and writing performance; 3 through 9 center around cooperative learning as it relates to various topics; 10 through 13 show practical ways to develop students' vocabulary with examples spanning curricular areas. The remaining strategies deal with improving students' comprehension and appreciation of what they read. NKA
