Focus on "winning" rather than "winning" or "loss".
You can start the day and realize the need to
use only what is better than your best to work
on your business processes and continue to
improve, communicate processes and continue to

use what is better now. Each time we work to
use the best, we can move forward. You can do
this without losing focus. You can do
this without losing your goals.

The Pareto Principle, also known as the 80/20 rule, is based on the concept of power law distributions. It states that 80% of the outcomes are produced by 20% of the inputs, and most of the time is spent on 20% of the tasks. This principle can be applied to business operations to focus your efforts on the most critical 20% of your operations.

For example, if you sell 100 products, 80% of your sales come from 20% of your products.
