Brett Hall,Nik Smith,2020-12-04 Master the foundations of modern Cisco Unified Communications UC system security This guide helps you build foundational knowledge for securing modern Cisco Unified Communications environments that support voice video messaging and meetings and support different types of real time collaboration capabilities based on mobile remote access and mobile devices based on bring your own device BYOD initiatives Writing for administrators and managers two Cisco collaboration experts bring together methods and insights to illuminate both the why and the how of effective collaboration security Using the proven Explain Demonstrate and Verify methodology they explain each threat demonstrate remediation and show how to confirm correct implementation You ll walk through securing each attack surface in a logical

progression across each Cisco UC application domain. The authors address key updates to Cisco collaboration architecture including Expressway Cisco Meeting Server encryption enhancements and advanced business to business collaboration. You'll find quick reference checklists in each chapter and links to more detail wherever needed. Begin by protecting your workforce through basic physical security and life safety techniques. Understand how attackers seek to compromise your UC system's network environment and your best countermeasures. Maintain security across all UC deployment types. Protect core UC applications by locking down and hardening the core operating system. Use encryption to protect media and signaling and enforce secure authentication. Secure Cisco Unified Communications Manager, Cisco Unity Connection and Cisco Meeting Server. Deploy Session Border Controllers to provide security controls for VoIP and video traffic. Provide additional protection at the edge of the network. Safeguard cloud based and hybrid cloud services. Enable organizations to seamlessly and securely connect to cloud UC services. Allow remote teleworker users to connect safely to local UC resources.

[Cisco LAN Switching Configuration Handbook](#) Steve McQuerry, David Jansen, Dave Hucaby, 2009 Cisco LAN Switching Configuration Handbook Second Edition. A concise reference for implementing the most frequently used features of the Cisco Catalyst family of switches. Steve McQuerry CCIE No 6108 David Jansen CCIE No 5952 David Hucaby CCIE No 4594 Cisco LAN Switching Configuration Handbook Second Edition is a quick and portable reference guide to the most commonly used features that can be configured on Cisco Catalyst switches. Written to be used across all Catalyst IOS platforms the book covers general use of Cisco IOS followed by a series of chapters that provide design and configuration guidelines. Each chapter starts with common design overviews and then describes the configuration of management features. Coverage includes Layer 2 Layer 3 multicast high availability and traffic management configurations. This book is organized by groups of common features with sections marked by shaded tabs for quick reference. Information on each feature is presented in a concise format with background configuration and example components. The format is organized for easy accessibility to commands and their proper usage saving you hours of research time. From the first page the authors zero in on quick facts, configuration steps and explanations of configuration options in each Cisco Catalyst switch feature. The quick reference format allows you to easily locate just the information you need without having to search through thousands of pages of documentation helping you get your switches up and running quickly and smoothly. Whether you are looking for a handy portable reference to more easily configure Cisco Catalyst switches in the field or you are preparing for CCNA, CCNP or CCIE certification you will find Cisco LAN Switching Configuration Handbook Second Edition to be an essential resource. Steve McQuerry CCIE No 6108 is a technical solutions architect with Cisco focused on data center solutions. Steve works with enterprise customers in the midwestern United States to help them plan their data center architectures. David Jansen CCIE No 5952 is a technical solutions architect TSA with Cisco focused on Data Center Architectures at Cisco. David has more than 20 years of experience in the IT industry. David Hucaby CCIE No 4594 is a lead network engineer for the University of Kentucky where he works with healthcare networks.
