Black Hole Marcia Bartusiak, 2015-04-28 The award winning science writer packs a lot of learning into a deceptively light and enjoyable read exploring the contentious history of the black hole New Scientist For more than half a century physicists and astronomers engaged in heated dispute over the possibility of black holes in the universe The strange notion of a space time abyss from which not even light escapes seemed to confound all logic Now Marcia Bartusiak author of Einstein's Unfinished Symphony and The Day We Found the Universe recounts the frustrating exhilarating and at times humorous battles over one of history's most dazzling ideas Bartusiak shows how the black hole helped revive Einstein's greatest achievement the general theory of relativity after decades of languishing in obscurity Not until astronomers discovered such surprising new phenomena as neutron stars and black holes did the once sedate universe transform into an Einsteinian cosmos filled with sources of titanic energy that can be understood only in the light of relativity Black Hole explains how Albert Einstein Stephen Hawking and other leading thinkers completely changed the way we see the universe

Theory and more **Global Elite Migrations** Irina Isaakyan,2024-09-23 This open access book explores the lives and careers of migrating artists with the purpose to understand how they make use of their migrant networks and how this process interacts with decisions they make about immigration and career development Situated at the crossroads of Migration Studies and Elite Studies this interdisciplinary research is based on sixty interpretive biographic interviews with opera singers from the former Soviet bloc who work in various places across Europe and beyond The book raises the question to what extent they exercise agency as migrants and professionals and to what extent they preserve their professional elitism on the transnational level The case of these migrant artists serves to illuminate the dynamics of a wider phenomenon global elite migrations which is compared with an intergalactic journey Through this sociological metaphor the book offers a new analytical framework to think about the agency network nexus **Nature** , **Choice** ,2007-03 **Earth Sciences History** ,2008 **American Journal of Physics** ,2007 **Sterne und Weltraum** ,2008 **The British National Bibliography** Arthur James Wells,2007 **Cosmic Catastrophes** Gerrit L. Verschuur,1978 A meteorite destroying Los Angeles Another ice age A star explosion Impossible not so according to astronomer Gerrit Verschuur who combines science fiction and science fact in this remarkable new book Cosmic Catastrophes predicts disasters on the largest possible scale catastrophes that could destroy our entire planet They could happen in a billion years or a thousand in a decade or tomorrow A nearby star explodes a large meteorite strikes the earth the temperature drops 100 to produce an ice age the magnetic field drops to zero a black hole orbiting the sun churns the earth's oceans into huge tidal waves Dr Verschuur points out that we are an integral part of the universe not just observers and that cosmic events can and will affect our lives he uses science fiction to explore some of the more chilling possibilities then presents the science facts behind each of the potential disasters Cosmic Catastrophes a fascinating book for armchair astronomers and science fiction buffs alike Pg 4 of cover **End** F.
