particulars of individuals who experienced personal epiphanies **Cosmic Consciousness: A Study in the Evolution of the Human Mind (Hardcover)** Richard Maurice Bucke,2018-07-24 Richard M Burke's astonishing treatise on the human mind discusses and attempts to explain mystical experiences in the context of evolutionary change in the brain. During his mid thirties Burke underwent a feeling of revelation and felt distinctly enlightened for a short time. Although the period of enlightenment passed it had an immense impact upon Burke's outlook steering his personal and professional life in a directions he had never before envisioned. He found the experience a permanent boon to his well being and was able to work and enjoy life more than he formerly had. This book attempts to explain the various mystical feelings of enlightenment which humans have experienced over the millennia of recorded history. Burke's opinion is that these phenomena are becoming commoner over time and represent an evolution of the human mind. He postulates that these experiences will become commoner as centuries go by and become accepted as an ordinary then eventually as a necessary part of human life.

*Cosmic Consciousness* Richard Maurice Bucke,2011-01-27 This work published in 1901 is the culmination of a lifetime of research and contemplation in which Richard Maurice Bucke 1837 1902 expounds his theory of the development and evolution of consciousness in living things. He uses his own experiences those of contemporaries such as Tennyson and of historical figures such as Francis Bacon as evidence for moments of higher consciousness and intellect known as cosmic consciousness. Bucke's theory is of three states of progressive consciousness attained through evolution: The Simple Consciousness of animals, Self Consciousness of man to understand his place in the universe and Cosmic Consciousness where man might grow to understand the life and order of the cosmos. This pinnacle of understanding is a progression assisted by evolution that Bucke hopes will one day come to all men. A thought provoking book at any time full of optimism for the intellectual future of the human race.

**Cosmic Consciousness** Richard Maurice Bucke, 1929 **Cosmic Consciousness** Ali Nomad, 2017-09-25 Man is essentially a spiritual being. The source of this spiritual Omniscience we may not in our finite intelligence fully cognize because full cognition would preclude the possibility of finite expression. The destiny of man is perfection. Man perfected becomes a god. Only the gods are immortal we are told. Let us consider what this means supposing it to be an axiom of truth. Mortality is subject to change and death. Mortality is the manifest the stage upon which man in his life plays many parts. Immortality is what the word says it is godhood re cognized in the mortal Im or Om the more general term stands for the Changeless Birthless Deathless Unnamable Power that holds the worlds in space and puts intelligence into man. Biologists even though they were to succeed in reproducing life by chemical processes from so called lifeless sterilized matter making so high a form of manifestation as man himself yet could never name the power by which they accomplished it. Always there must remain the Unknownable the Absolute **Cosmic Consciousness** M. D. Richard Maurice Bucke, 2011-03 Cosmic Consciousness A Study in the Evolution of the Human Mind is Richard Bucke's theory that our mental states are evolving and that to date we have experienced three stages in the development of consciousness the simple consciousness of animals the self consciousness of the vast majority of humans reason self awareness imagination etc and in some cases cosmic consciousness a mystical state of being beyond self consciousness and the next stage of human development Bucke hypothesized that cosmic consciousness is slowly beginning to appear in humans and will eventually spread widely throughout the human race. He posited that certain notable individuals throughout history have demonstrated that they have

attained cosmic consciousness In the book he cites examples such as Jesus Buddha Mohammed Dante St Paul Francis Bacon William Blake and his close friend Walt Whitman Whitman an American poet and journalist described cosmic consciousness as ineffable light light rare untellable light beyond all signs descriptions and languages At the age of thirty five Bucke found himself in this elevated mental state and he describes in the third person the manifestations leading up to it 1 The person suddenly without warning has a sense of being immersed in a flame or rose colored cloud or perhaps rather a sense that the mind is itself filled with such a cloud of haze 2 At the same instant he is as it were bathed in an emotion of joy assurance triumph salvation 3 Simultaneously or instantly following the above sense and emotional experiences there comes to the person an intellectual illumination quite impossible to describe Like a flash there is presented to his consciousness a clear conception a vision in outline of the meaning and drift of the universe He does not come to believe merely but he sees and knows that the cosmos which to the self conscious mind seems made up of dead matter is in fact far otherwise is in very truth a living presence He sees that instead of men being as it were patches of life scattered through an infinite sea of non living substance they are in reality specks of relative death in an infinite ocean of life He sees that the life which is in man is eternal as all life is eternal that the soul of man is as immortal as God is that the universe is so built and ordered that without any peradventure all things work together for the good of each and all that the foundation principle of the world is what we call love and that the happiness of every individual is in the long run absolutely certain He goes on to say The person who passes through this experience will learn in the few minutes or even moments of its continuance more than in months or years of study and he will learn much that no study ever taught or can teach After reading Bucke's writings P D Ouspensky the respected Russian Philosopher echoed his comments in his book *Tertium Organum* Cosmic Consciousness is a third form which is as far above Self Consciousness as is that above Simple Consciousness The prime characteristic Cosmic Consciousness is as its name implies a consciousness of the cosmos that is of the life and order of the universe Along with the consciousness of the cosmos there occurs an intellectual enlightenment or illumination which alone would place the individual on a new plane of existence would make him almost a member of a new species *Cosmic Consciousness* Richard Maurice Bucke, 1951 [Cosmic Consciousness](#) Richard Bucke, 2018-09-28 Cosmic Consciousness A Study in the Evolution of the Human Mind is Richard Bucke's magnum opus He asserts that humans are evolving from ancient animal consciousness through present ego consciousness to budding transcendent cosmic consciousness This a mystical state experienced by few to date but it is the next stage of human development Bucke hypothesizes that cosmic consciousness is slowly beginning to appear in humans and will eventually spread widely throughout the human race He examines notable individuals throughout history who have demonstrated attainment of cosmic consciousness Such examples include Buddha Plotinus St Paul Jesus Lao Tzu Dante Francis Bacon William Blake and Walt Whitman Whitman an American poet and journalist described cosmic consciousness as ineffable light light rare untellable light beyond all signs descriptions and languages
