Children's Literature in Translation Jan Van Coillie, Jack McMartin, 2020-10-30 For many of us our earliest and most meaningful experiences with literature occur through the medium of a translated children's book This volume focuses on the complex interplay that happens between text and context when works of children's literature are translated what contexts of production and reception account for how translated children's books come to be made and read as they are How are translated children's books adapted to suit the context of a new culture Spanning the disciplines of Children's Literature Studies and Translation Studies this book brings together established and emerging voices to provide an overview of the analytical empirical and geographic richness of current research in this field and to identify and reflect on common insights analytical perspectives and trajectories for future interdisciplinary research This volume will appeal to an interdisciplinary audience of scholars and students in Translation Studies and Children's Literature Studies and related disciplines It has a broad geographic and cultural scope with contributions dealing with translated children's literature in the United Kingdom the United States Ireland Spain France Brazil Poland Slovenia Hungary China the former Yugoslavia Sweden Germany and Belgium

Gender by the Book Julie Fette, 2024-10-31 Gender by the Book investigates the gender representations that French children's literature transmits to readers today Using an interdisciplinary mixed methods approach this book grounds its literary analysis in a sociohistorical examination of three key institutions libraries book clubs and subscription magazines that circulate reading material to children It shows how French policies cultural beliefs and market forces influence the content of children's literature including tensions between State support for unprofitable artistic endeavors and a belief in children's right to high quality products on the one hand and suspicion of activism as anathema to creativity and fear of losing boy readers on the other In addition the notion of universalism which asserts that equality is best achieved when society is blind to differences thwarts a diverse and equitable array of literary representations Nevertheless conditions are favorable for 21st century French children's publishers to offer a robust body of richly entertaining egalitarian literature for children This title is freely available as open access thanks to generous support from the Fondren Library at Rice University

Editions des Femmes as well as its relationship to the French Women's Liberation Movement MLF from 1972 to the present. The founding and subsequent success of Editions des Femmes in the publishing milieu intensified the ideological divisions within the MLF and highlighted the extent to which that movement failed to adequately reflect on the power inherent in its recourse to print culture as an agent of change. In particular, Editions des Femmes produced several periodical publications and pioneered a woman-centered subculture that attached militant political meanings to the practice of buying and publishing books. While the MLF succeeded in changing legislation detrimental to women, it was not able to create unified cultural politics or construct a long-term media strategy that could preserve the movement's original ideals and unity. Jennifer L. Sweatman explores the long-term dissipation of the MLF as a unified force not only as an outcome of ideological disagreement but also due to conflicting views on culture, women's creativity as a strategy for empowerment, and the utility of media for creating change. As the MLF fragmented, unable to fully come to terms with its various consumer identities, its need for capital to support creative projects and its difficult experience with collective decision-making, the Editions des Femmes project was seen as incredibly controversial. However, Editions des Femmes embodied a broader strategy for cultural transformation that privileged women's creative works rather than feminism, situating it as a successful forerunner of the revitalization of the publishing industry from below, as small independent houses challenged the large media conglomerate control of the industry.
