Counterpoints Socials 11:

The Impact of Multiculturalism on Public Education, 50 Years Later, 2024-12-09 This volume grew out of a symposium held at the University of Alberta in March 2021 in commemoration of the 50th anniversary of official multiculturalism in Canada. Scholars gathered online during the Covid 19 pandemic to take stock and reflect on the extent and ways multiculturalism legislation and evolving policy has impacted education. Scholars used varied and contrasting approaches to educational theory to think about multiculturalism and its impacts including terror management theory, the middle scale art theory and pentimenti, transitional justice, intraminority and interminority relations, the null curriculum and ideas of cultural humility, hope and cultural comfort among others. *Human Rights, Diversity, and National Identity* Patricia E. Bromley, 2011 Fundamental world changes that simultaneously undermine a nation state's charisma and promote the rise of a supra national system have wide ranging effects upon national states within a modern global society. My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling which are central institutions in every country. Globally, primary and secondary education initially emerged as the premier tool for nation states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition. I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education. The analyses consist of two sections. Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970-2008. These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well established liberal democracies. Cross national quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia, BC which examines nation building within a context of strong emphasis on diversity and human rights. The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871. It also draws on a selection of historical documents including Ministry of Education reports, curricular frameworks and high school exit exams. Process wise, I find the incorporation of human rights and diversity reflects macro level changes in national and global society. Content wise, I find four main approaches to reconciling ideas of human rights and diversity with national identity: 1. framing human rights and multiculturalism as part of national identity, 2. using pedagogical approaches that promote multiple perspectives and individual agency, 3. celebrating social and scientific figures and accomplishments as the source of national pride, and 4. drawing on exogenous sources to affirm state legitimacy. This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of this trend. A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world. Further, students are increasingly taught that the global civil society and non state actors are important and legitimate agents of social change.

Burnt by Democracy Jacqueline Kennelly, 2023-11-30 *Burnt by Democracy* traces the political ascendance of neoliberalism and its effects on youth The book explores democracy and citizenship as described in interviews with over forty young people ages 16 to 30 who have either experienced homelessness or identify as an activist living in five liberal democracies Canada Australia New Zealand the United States and the United Kingdom Highlighting significant cuts to social and affordable housing astronomical increases in the costs of higher education and the transformation and erosion of state benefits systems Jacqueline Kennelly argues that democracy's decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties Rather it is because of collective misunderstanding about how democracy is actually structured how individuals learn to participate and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions Against a vivid and often heart breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever expanding state retrenchment and inequality *Burnt by Democracy* makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing field for all
