Counting Species Biodiversity In Global Environmental Politics:

Counting Species Rafi Youatt, 2015-02-14 Three decades of biodiversity governance has largely failed to stop the ongoing environmental crisis of global species loss Yet that governance has resulted in undeniably important political outcomes In *Counting Species* Rafi Youatt argues that the understanding of global biodiversity has produced a distinct vision and politics of nature one that is bound up with ideas about species norms of efficiency and apolitical forms of technical management Since its inception in the 1980s biodiversity's political power has also hinged on its affiliation with a series of political concepts Biodiversity was initially articulated as a moral crime against the intrinsic value of all species In the 1990s and early 2000s biodiversity shifted toward an association with service provision in a globalizing world economy before attaching itself more recently to the discourses of security and resilience Even as species extinctions continue biodiversity's role in environmental governance has become increasingly abstract Yet the power of global biodiversity is eventually always localized and material when it encounters nonhuman life In these encounters Youatt finds reasons for optimism tracing some of the ways that nonhuman life has escaped human social means *Counting Species* compellingly offers both a political account of global biodiversity and a unique approach to political agency across the human nonhuman divide *The Oxford Handbook of Environmental Political Theory* Teena Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016-01-07 Set at the intersection of political theory and environmental politics yet with broad engagement across the environmental social sciences and humanities *The Oxford Handbook of Environmental Political Theory* defines illustrates and challenges the field of environmental political theory EPT Featuring contributions from distinguished political scientists working in this field this volume addresses canonical theorists and contemporary environmental problems with a diversity of theoretical approaches The initial volume focuses on EPT as a field of inquiry engaging both traditions of political thought and the academy In the second section the handbook explores conceptualizations of nature and the environment as well as the nature of political subjects communities and boundaries within our environments A third section addresses the values that motivate environmental theorists including justice responsibility rights limits and flourishing and the potential conflicts that can emerge within between and against these ideals The final section examines the primary structures that constrain or enable the achievement of environmental ends as well as theorizations of environmental movements citizenship and the potential for on going environmental action and change *The Abyss Stares Back* Stacy Alaimo, 2025-05-13 In an era of accelerating extinctions what does it mean to discover thousands of new species in the deep sea As we see the catastrophic effects of the Anthropocene proliferate advanced technologies also grant us greater access to the furthest reaches of the world's oceans facilitating the discovery of countless new species Sorting through the implications of this strange paradox Stacy Alaimo explores the influence this newfound intimacy with the deep sea might have on our broader relationship to the nonhuman world While many images of these abyssal creatures circulate as shallow clickbait aesthetic representations can be enticing

lures for speculating about their lives profoundly expanding our environmental concern *The Abyss Stares Back* analyzes a diverse range of scientific literary and artistic accounts of deep sea exploration including work from the naturalist William Beebe and the artist Else Bostelmann as well as results of the Census of Marine Life that began at the turn of the twenty first century As she focuses on oft overlooked creatures of the deep such as tubeworms hatchetfish siphonophores and cephalopods which are typically cast as alien Alaimo shows how depictions of the deep seas have been enmeshed in long colonial histories and racist constructions of a threatening abyss Drawing on feminist environmentalism posthumanism science and technology studies and Indigenous and non Western perspectives Alaimo details how our understanding of science is fundamentally altered by aesthetic encounters with these otherworldly life forms She argues that although the deep sea is often thought of as a lifeless void with little connection to human existence our increasing devastation of this realm underscores our ethical obligation to protect the biodiverse life in the depths When the abyss stares back it demands recognition Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions

Cosmopolitan Belongingness and War Matthew Leep, 2021-05-01 In *Cosmopolitan Belongingness and War* Matthew Leep develops a cosmopolitan account of war that blends sharp inquiry into interspecies politics with original poetry on animals loss and war Informed by the works of Jacques Derrida this book is not only a somber and sobering exploration of the loss of animal lives during the Iraq War from the initial US invasion to later struggles with ISIS but also an imaginative tracing of animal experiences in spectral poetic moments By emphasizing elegies poetic space and multispecies belonging Leep envisions the cosmopolitan text as a hybrid form of critical and poetic engagement with animal others An insightful mix of cosmopolitan poetics poetry and analysis of the Iraq War in its multispecies entanglements *Cosmopolitan Belongingness and War* connects contemporary concerns with political violence memory and interspecies politics to imagine a more spectral posthumanist and poetic cosmopolitanism Interdisciplinary in scope this book will engage scholars of international relations political theory US foreign policy animal studies poetry and Derrida as well as those interested in human animal relations in perilous times

The Greening of Antarctica Alessandro Antonello, 2019-05-03 In *The Greening of Antarctica* Alessandro Antonello investigates the development of an international regime of environmental protection and management between the signing of the Antarctic Treaty in 1959 and the signing of the Convention on the Conservation of Antarctic Marine Living Resources in 1980 In those two decades the Antarctic Treaty parties and an international community of scientists reimagined what many considered a cold sterile and abiotic wilderness as a fragile and extensive regional ecosystem Antonello investigates this change by analyzing the negotiations and developments surrounding four environmental agreements the Agreed Measures for the Conservation of Antarctic Fauna and Flora in 1964 the Convention for the Conservation of Antarctic Seals in 1972 a voluntary restraint resolution on Antarctic mining in 1977 and the Convention on the Conservation of Antarctic Marine Living Resources in 1980 Though distant from world populations

Antarctica has long been a site of inter state contest for geopolitical power and standing This book reveals how a range of contests geopolitical epistemic and imaginative created the environmental protection regime of the Antarctic Treaty System and discusses the tension between states individual searches for power and the collective desire for stability in the region In this international and diplomatic context the actors were not only trying to keep relations between themselves orderly but they were also using treaties to order the human relationship with the environment Drawing on a wide range of international archives many newly opened The Greening of Antarctica offers the first detailed narrative of a crucial period in Antarctic history and reveals the contours of global environmental thought and diplomacy in the transformative Age of Ecology

Infowhelm Heather Houser,2020-06-16 How do artists and writers engage with environmental knowledge in the face of overwhelming information about catastrophe What kinds of knowledge do the arts produce when addressing climate change extinction and other environmental emergencies What happens to scientific data when it becomes art In *Infowhelm* Heather Houser explores the ways contemporary art manages environmental knowledge in an age of climate crisis and information overload Houser argues that the infowhelm a state of abundant yet contested scientific information is an unexpectedly resonant resource for environmental artists seeking to go beyond communicating stories about crises *Infowhelm* analyzes how artists transform the techniques of the sciences into aesthetic material repurposing data on everything from butterfly migration to oil spills and experimenting with data collection classification and remote sensing Houser traces how artists ranging from novelist Barbara Kingsolver to digital memorialist Maya Lin rework knowledge traditions native to the sciences entangling data with embodiment quantification with speculation precision with ambiguity and observation with feeling Their works provide new ways of understanding environmental change while also questioning traditional distinctions between types of knowledge Bridging the environmental humanities digital media studies and science and technology studies this timely book reveals the importance of artistic medium and form to understanding environmental issues and challenges our assumptions about how people arrive at and respond to environmental knowledge Qui Parle ,2015 The Philosopher's Index ,2008 Vols for 1969 include a section of abstracts **Biodiversity Information** D.
