*Policy issues and options in aquatic food systems: Review of frameworks, tools, and studies* Ragasa, Catherine,Loison, Sarah Alobo,2023-01-24 Although policies can be critical constraining or enabling factors for aquatic food systems AqFS development scarce evaluation of the impacts of existing policies means that decision makers have limited understanding of how to improve the design and implementation of effective policies This paper reviews key policy issues in AqFS and how they have been analyzed and assessed to provide context tailored policy options and guidance Our review shows that countries face many policy issues but have little analysis on them Despite the availability of a wide variety of frameworks concepts tools methods and approaches their application in empirical analysis to solve policy issues in AqFS has been limited More research is available on local and community level governance of fisheries but less on national or subnational policies and regulations in AqFS The few

available policy studies focus on developed countries with fewer applications in developing countries where growth of the aquaculture and fisheries sectors is much stronger The studies provide useful policy options and guidance and this review highlights the need for more such studies to address policy related issues in the sector *Putting Jurisprudence Back Into Economics* David Ellerman,2021-06-24 This book presents an integrated jurisprudential critique of neoclassical microeconomic theory It explains what is really wrong with the theory both descriptively as well as normatively The criticism presented is based on questions of jurisprudence and on neoclassical theory's sins of omission and commission concerning the underlying system of property and contract On the positive side while the presentation is almost entirely non mathematical the book contains the first mathematical treatment of the fundamental theorem about property and contract in jurisprudence that underlies a market economy The book follows the tradition of John Stuart Mill as the last major political economist who considered the study of property rights as an integral part of economic theory The conceptual criticisms presented in this book focus on the descriptive and normative misconceptions about property and contracts that are deeply embedded ideology in neoclassical economics not to mention in the broader society The book recognizes that the idealized microeconomic theory is not descriptive of reality and focuses its criticism on conceptual mistakes in the theory which are even clearer due to the idealized nature of the theory Therefore the book is a must read for scholars researchers and students interested in a better understanding of jurisprudence in economics neoclassical microeconomic theory and political economy in general
