Social Sustainability for Business Jerry A. Carbo, Viet T. Dao, Steven J. Haase, M. Blake Hargrove, Ian M. Langella, 2017-08-16 Social Sustainability for Business demonstrates the need for a transformational change to the way businesses across the globe operate. What has become the standard accepted business model with a focus on corporate profit shareholder wealth maximization and GDP growth is no longer a sustainable business model for workers consumers communities society the planet or any of its inhabitants and ecosystems. The authors argue that the current commercial system depletes natural resources denigrates human rights and inhibits positive social and technological innovation. To address these issues they focus on societal goals such as a sustainable planet meeting human rights of workers and safe products for consumers and outline steps that organizations and individuals must take to achieve them. Readers will gain insight into the psychological barriers to and influences on sustainable behavior. They will also learn how reconsidering corporate social responsibility and business ethics can stop and reverse the destruction of a profit based approach. Cases on modern examples of sustainability or lack thereof explain how establishing and maintaining a socially sustainable business system can protect the environment meet the rights of its people and ensure that their needs are met tomorrow. End of chapter and end of case discussion questions will help students in sustainability classes to think critically about the practical impact of the topics discussed.

*Leaders Eat Last Deluxe* Simon Sinek, 2014-01-07 The Deluxe Edition of Leaders Eat Last now with an expanded chapter and appendix on leading millennials includes over 30 minutes of exclusive video and 30 minutes of audio of Simon Sinek. The acclaimed bestselling author of Start With Why and Together is Better delves deeper into book's themes and shares additional examples and insights. Imagine a world where almost everyone wakes up inspired to go to work feels trusted and valued during the day then returns home feeling fulfilled. This is not a crazy idealized notion. Today in many successful organizations great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams no matter what incentives are offered are doomed to infighting fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. Officers eat last he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield. Great leaders sacrifice their own comfort even their own survival for the good of those in their care. Too many workplaces are driven by cynicism paranoia and self interest. But the best ones foster trust and

cooperation because their leaders build what Sinek calls a Circle of Safety that separates the security inside the team from the challenges outside Sinek illustrates his ideas with fascinating true stories that range from the military to big business from government to investment banking

Technology is an important part of our everyday lives Whether we ask Alexa to start the coffee machine or check our phones for the traffic report we increasingly interact with technology As much as we may enjoy and rely upon technology it is not without its challenges including the inability of the law to keep pace with technological developments and the ethical issues that arise For example tort law is impacted by technology the proliferation of drones requires a new look at the law of trespass and video Zoom meetings can impose direct liability on employers for example Social media supports an increasing

share of all advertising and endorsements and is subject to regulation of which influencers are often not aware Global advertising expenditures on various internet and social media platforms also drives the need for a change in right of publicity law In the United States the right of publicity is governed by state rather than federal law so there is no uniform approach One part of the book includes a survey of the law of each US state and proposes a new federal statute Although most of the examples are drawn from the US the issues raised are fully international in scope and relevance This book will appeal to legal practitioners trying to manage new technology issues facing their clients academics teaching students how the law is changing and needs to continue to change as technology develops and teachers and researchers in business and management schools needing to address technology and governance issues
