Covering China From Cyberspace In 2014:

Covering China from Cyberspace in 2014 China Digital Times, 2015-01-15 *Covering China from Cyberspace in 2014* reviews the year's major events as seen through the eyes of Chinese censors and the netizens who are brave enough to defy them. A crackdown on free speech and activism that began as soon as President Xi Jinping took office in 2012 only intensified and broadened throughout 2014. A steady stream of filtered search terms and propaganda directives guided coverage and discussion of a broad variety of topics and stories from Xi's visit to a steamed bun shop to the arrest of former security chief Zhou Yongkang. The 25th anniversary of June 4th and the protest movement in Hong Kong were both among the most strictly censored stories in China in recent memory. But the harsh tactics used by authorities to silence their critics did not work to intimidate the most outspoken Internet users who continued to find creative ways to express themselves. This yearbook is not an effort to chronicle everything that happened in China this past year. Rather, it provides a unique lens on some of the biggest stories in China in 2014 by compiling the best of the news reports, analysis, Internet commentary, propaganda, directives, cartoons, and other images. *Covering China from Cyberspace in 2014* is a valuable resource for China analysts, journalists, students, and others who wish to broaden their knowledge and understanding of recent events in the country.

China's Cyber Warfare Jason R. Fritz, 2017-03-21 The turn of the century was accompanied by two historically significant phenomena. One was the emergence of computer networks as a vital component of advanced militaries and interdependent global economic systems. The second concerned China's rise on the global stage through economic reforms that led to sustained growth and military modernization. At the same time, Chinese government policies and actions have drawn international criticisms, including persistent allegations of online espionage, domestic Internet censorship, and an increased military capability, all of which utilize computer networks. These threat perceptions are heightened by a lack of transparency. Unlike the United States or the North Atlantic Treaty Organization, China does not articulate its strategic doctrine. Further open source material on this topic is often contradictory, cursory, and unclear due in part to the absence of consensus on cyber-related terminology and the infancy of this field. With a focus on the period 1998 to 2016, this book identifies and analyzes the strategic context, conceptual framework, and historical evolution of China's cyber warfare doctrine. *The Making of China's Artificial Intelligence and Cyber Security Policy* Suisheng Zhao, 2025-08-08 The rise of digital technology, particularly artificial intelligence (AI), has transformed societies and international politics. China has responded to the transformation and strived to become one of the global leaders. What is China's approach toward the objective? Who are the major players and stakeholders in the making of digital policy? How has the Chinese state worked with various stakeholders? To what extent has digital technology influenced China's authoritarian governance? How has Chinese society responded to digital authoritarianism? Can China prevail in shaping global digital rulemaking? This edited volume seeks answers to these important questions. Divided into three parts, Part I examines how the central state has become a leading player and

coordinated with various stakeholders such as academic institutions corporations and local governments in making digital technology policy Part II analyses how the Chinese party state used digital technology to strengthen authoritarian governance and how society has responded to digital authoritarianism Part III explores China's attempt to shape global digital rulemaking in competition with the US and other Western countries This book is aimed at scholars researchers policymakers and students with an interest in digital technology international relations Chinese politics and authoritarian governance It will also appeal to those studying AI digital governance and global power dynamics The chapters in this book were originally published in the Journal of Contemporary China and come with a new introduction

Travellers, Merchants and Settlers in the Eastern Mediterranean, 11th-14th Centuries David Jacoby, 2023-05-31 This collection of studies the eighth by David Jacoby covers a period witnessing intensive geographic mobility across the Mediterranean illustrated by a growing number of Westerners engaging in pilgrimage crusade trading and shipping or else driven by sheer curiosity This movement also generated western settlement in the eastern Mediterranean region A complex encounter of Westerners with eastern Christians and the Muslim world occurred in crusader Acre the focus of two papers a major emporium it was also the scene of fierce rivalry between the Italian maritime powers The fall of the crusader states in 1291 put an end to western mobility in the Levant and required a restructuring of trade in the region The next five studies show how economic incentives promoted western settlement in the Byzantine provinces conquered by western forces during the Fourth Crusade and soon after Venice fulfilled a major function in Latin Constantinople from 1204 to 1261 The city's progressive economic recovery in that period paved the way for its role as transit station furthering western trade and colonization in the Black Sea region Venice had also a major impact on demographic and economic developments in Euboea located along the maritime route connecting Italy to Constantinople On the other hand military factors drove an army of western mercenaries to establish in central Greece a Catalan state which survived from 1311 to the 1380s
