The Effect of Founder-CEO Overconfidence on Merger Premium Christoph Meyer,2015-05-08 Master s Thesis from the year 2014 in the subject Business economics Investment and Finance grade 1 0 Heriot Watt University Edinburgh Finance course Corporate Finance language English abstract Theoretical and empirical research has indicated that overconfidence affects merger decision making and merger premium However founder CEOs have not been subject of such a study yet This lack is particular surprising when considering the differences between founder and manager CEOs as well as

the media attention of founder CEOs The present dissertation aims to fill the research gap through investigating the effect of founder CEO overconfidence on merger premium in the high tech industry Moreover this dissertation aims to extend the literature by including target CEO overconfidence and studying the impact on merger premium when both acquirer and target CEO are overconfident By studying founder CEOs this dissertation also aims to establish the effectiveness of founders as CEOs The resource based perspective argues that while founders help in the early years of the company they become less effective as the firm evolves since they lack the necessary management skills Design methodology approach Using ordinary least square OLS technique this study investigates the effects of implemented factors in determining the merger premium paid in high tech acquisitions A sample consisting of 245 acquisitions in the high tech industry of 124 CEOs during a 19 year period 1995 to 2013 has been observed In order to test the founder CEO effects this dissertation develops a matched sample approach of 62 founder CEOs and 62 manager CEOs This study shows a strong relationship between CEO overconfidence and acquisitions premium paid The results suggest that the CEO overconfidence may provide an explanation for the well rehearsed overpayment problem An additional analysis indicates that the highest premium is paid when combined acquiring and target firm CEO overconfidence exist The dissertation also shows that founder CEOs pay higher premia than manager CEOs in the high tech industry It has been proven that founder CEOs decisions are more independent from interventions of the board of directors and that founder CEO overpayment is not dependent on the company's size or relatedness of mergers The findings are reliable as the results remain constant for applied robustness tests **Introductory Statistics** Prem S. Mann, 2016-02-19 Introductory Statistics 9th Edition is written for a one or two semester first course in applied statistics and is intended for students who do not have a strong background in mathematics The only prerequisite is knowledge of elementary algebra Introductory Statistics is known for its realistic examples and exercises clarity and brevity of presentation and soundness of pedagogical approach **Managerial and Technical Writing** Chester L. Advanced Corporate Compliance Workshop, 2008 How justifiable is high CEO pay in the United States? Christoph Kotsch, 2016-11-28 Seminar paper from the year 2016 in the subject Philosophy Practical Ethics Aesthetics Culture Nature Right grade 1.0 University of Graz Graz International Summer School Seggau course Transformation Transgressions and Trust in Europe and the Americas language English abstract The high compensation for executives and in particular for CEOs has been a topic of debate for many years Increasing salaries and bonuses for leaders of companies have mostly been criticized and even pointed out as a key factor for a rising wealth distribution inequality Especially in the United States where CEO pay is most extreme the public as well as the media ask for new regulations and political intervention But are these high compensations really undeserved and unfair How much do top managers actually earn and why do businesses support it This academic paper will first give an overview of some important numbers and statistics in order to have an idea of how high a CEO's income is compared to an average employee It will also explain how to properly interpret these data and

how much an executive's income can vary depending on different factors. After analyzing the recent history and developments in CEO pay chapter 8 will provide the necessary economic background to help understand companies' decisions and see high wages from a business point of view. Although the paper will focus on CEO earnings in the US it will give examples of differences in other countries and systems. Due to a distinct set of labor regulations we will draw a comparison to CEO pay in Germany and furthermore illustrate the event of a political referendum in Switzerland. Finally we will pick on various arguments by media the public as well as renowned economists listing a series of pros and cons for excessive CEO pay. An insightful survey conducted in the US will then close the debate and leave the reader with the final thoughts of the conclusion.
