Chat With Swedish Women:

Swedish Mentality Åke Daun,1996-01-12 Is there a distinctly Swedish national character Are Swedes truly shy unemotional conflict avoiding melancholy and dour Swedish Mentality the English translation of the hugely successful book published in Sweden in 1989 considers the reality behind the myth The author Åke Daun is a respected ethnologist who is sometimes referred to as the guru of Swedish character In recent years it has become popular to discuss Swedishness and Swedish identity The advent of the European Union and the increasing presence of immigrant refugees in Sweden have fueled public debate on the distinctiveness of Swedish culture Daun however goes beyond stereotype drawing upon statistics gathered over more than a decade of research The result is an entertaining and engagingly written book Throughout Daun quotes from interviews with native Swedes and immigrants as well as from travel accounts folklore and proverbs We learn why some Swedes might prefer to walk up a flight of stairs rather than share an elevator with a neighbor and why some gain satisfaction from walking alone in the woods or going fishing Daun describes a range of factors influencing Swedish character including population composition rural background and even climate He recognizes behavioral variations related to gender age class and region and he considers subtleties of individual character as well Swedish Mentality should interest a wide array of readers whether of Swedish descent or not

Willingness to Communicate, Multilingualism and Interactions in Community Contexts Alastair Henry,Peter D. MacIntyre,2023-10-10 This book presents the findings of an in depth qualitative longitudinal investigation into the willingness to communicate WTC of individuals who through varying migration channels left one cultural linguistic context to make a new life in another It examines communication behaviours and language choice in multilingual community contexts and emphasises how even the most trivial of communication events are embedded in histories of previous communication and are influenced by emotions connected with a person s overall life situation The book fills a gap in contemporary WTC research by examining how WTC operates in multilingual community contexts Through the use of a complexity lens and the presentation of a revised 3D pyramid model the authors demonstrate the dynamic nature of WTC and shed new light on processes that affect communication migration and well being This book will be of interest to researchers seeking to explore individual differences using context sensitive and temporally focused designs
