Modeling the Power Consumption and Energy Efficiency of Telecommunications Networks Kerry James

Hinton, Robert Ayre, Jeffrey Cheong, 2021-10-28 This book introduces the technical foundations and tools for estimating the power consumption of internet networks and services including a detailed description of how these models are constructed and applied Modeling the Power Consumption and Energy Efficiency of Telecommunications Networks can be used to gain insight into the construction of mathematical models that provide realistic estimates of the power consumption of internet networks and services This knowledge enables forecasting the energy footprint of future networks and services to integrate sustainability and environmental considerations into network planning and design FEATURES Provides the motivation for developing mathematical models for telecommunications network and service power consumption and energy efficiency modeling Presents factors impacting overall network and service power consumption Discusses the types of network equipment and their power consumption profiles Reviews the basics of power modeling including network segmentation traffic forecasting top down and bottom up models wired and wireless networks data centers and servers Explores the application of energy efficiency metrics for equipment networks and services This book is aimed at students and technologists as well as technology managers and policy makers This book will be of value to any organization that wishes to estimate the energy footprint of the use of information and communications technologies This book can also be integrated into a course on the sustainability of information and communications technologies

Challenges of Power Engineering and Environment Ke-fa Cen, Yong Chi, Jianhua Yan, 2009-03-27 This book is the proceedings of the International Conference on Power Engineering 2007 The fields of this book include power engineering and relevant environmental issues The recent technological advances in power engineering and related areas are introduced This book is valuable for researchers engineers and students majoring in power engineering

Interference Mitigation and Energy Management in 5G Heterogeneous Cellular Networks Yang, Chungang, Li, Jiandong, 2016-11-22 In recent years wireless networks have become more ubiquitous and integrated into everyday life As such it is increasingly imperative to research new methods to boost cost effectiveness for spectrum and energy efficiency Interference Mitigation and Energy Management in 5G Heterogeneous Cellular Networks is a pivotal reference source for the latest research on emerging network architectures and mitigation technology to enhance cellular network performance and dependency Featuring extensive coverage across a range of relevant perspectives and topics such as interference alignment resource allocation and high speed mobile environments this book is ideally designed for engineers professionals practitioners upper level students and academics seeking current research on interference and energy management for 5G heterogeneous cellular networks

Mobile Robots Zoran Gacovski, 2011-10-26 This book consists of 18 chapters divided in four sections Robots for Educational Purposes Health Care and Medical Robots Hardware State of the Art and Localization and Navigation In the first section there are four chapters

covering autonomous mobile robot Emmy III KCLBOT mobile nonholonomic robot and general overview of educational mobile robots In the second section the following themes are covered walking support robots control system for wheelchairs leg wheel mechanism as a mobile platform micro mobile robot for abdominal use and the influence of the robot size in the psychological treatment In the third section there are chapters about I2C bus system vertical displacement service robots quadruped robots kinematics and dynamics model and Epi q hybrid robots Finally in the last section the following topics are covered skid steered vehicles robotic exploration new place recognition omnidirectional mobile robots ball wheel mobile robots and planetary wheeled mobile robots

Advanced Information Networking and Applications Leonard Barolli, Isaac Woungang, Tomoya Enokido, 2021-04-26 This book covers the theory design and applications of computer networks distributed computing and information systems Networks of today are going through a rapid evolution and there are many emerging areas of information networking and their applications Heterogeneous networking supported by recent technological advances in low power wireless communications along with silicon integration of various functionalities such as sensing communications intelligence and actuations is emerging as a critically important disruptive computer class based on a new platform networking structure and interface that enable novel low cost and high volume applications Several of such applications have been difficult to realize because of many interconnections problems To fulfill their large range of applications different kinds of networks need to collaborate and wired and next generation wireless systems should be integrated in order to develop high performance computing solutions to problems arising from the complexities of these networks The aim of the book *Advanced Information Networking and Applications* is to provide latest research findings innovative research results methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications
