### **Contributor Identity Ppt Free:**

**Lessons from the Identity Trail** Ian Kerr, Carole Lucock, Valerie Steeves, 2009-03-18 During the past decade rapid developments in information and communications technology have transformed key social commercial and political realities. Within that same time period working at something less than internet speed much of the academic and policy debates arising from these new and emerging technologies have been fragmented. There have been few examples of interdisciplinary dialogue about the potential for anonymity and privacy in a networked society. *Lessons from the Identity Trail* fills that gap and examines key questions about anonymity, privacy and identity in an environment that increasingly automates the collection of personal information and uses surveillance to reduce corporate and security risks. This project has been informed by the results of a multi-million dollar research project that has brought together a distinguished array of philosophers, ethicists, feminists, cognitive scientists, lawyers, cryptographers, engineers, policy analysts, government policy makers and privacy experts. Working collaboratively over a four-year period and participating in an iterative process designed to maximize the potential for interdisciplinary discussion and feedback through a series of workshops and peer review, the authors have integrated crucial public policy themes with the most recent research outcomes.

**The Use of Children's Literature in Teaching** Alyson Simpson, 2016-03-22 *The Use of Children's Literature in Teaching* reveals the impact of politics, professional guidelines and restrictive measurements of literacy on the emerging identities of young teachers. It places renewed emphasis on the importance of creative teaching with children's literature for the empowerment of teacher agency to enhance the learning of their students. Framing the debate alongside the issue of teacher autonomy, Simpson describes results from a two-year study which brings together information from interviews, surveys, document analysis and digital stories from Australia, Canada, the UK and the US to assess the role of children's literature in pre-service teacher education. Through cross-cultural comparison, this research captures the different levels of connection between politics, education systems, higher education and pre-service teachers. It exposes how politics' narrow views of professionalism and program structures in teacher education may adversely affect the development of pre-service teachers. This book presents a strong case that reading and responding critically to literary texts leads to better educational outcomes than basic decoding and low-level comprehension training. As such, this book will be of great interest to researchers and scholars working in the areas of teacher education and literacy and primary education. It should also be essential reading for teacher educators and policymakers.
