Chasing Dirt Chasing Dirt:

Chasing Dirt Suellen Hoy, 1995 Sanitary Commission headed by Frederick Law Olmsted and revealing how the efforts of Florence Nightingale in the Crimean War inspired American women such as Dorothea Dix Clara Barton and Louisa May Alcott to volunteer as nurses during the war. We also read of the postwar efforts of George E Waring Jr a sanitary engineer who constructed sewer systems around the nation and who as head of New York City's street cleaning department transformed the city from the nation's dirtiest to the nation's cleanest in three years. Hoy details the efforts to convince African Americans and immigrants of the importance of cleanliness examining the efforts of Booker T. Purity and Danger Mary Douglas, 2003 In this classic work Mary Douglas identifies the concern for purity as a key theme at the heart of every society. She reveals its wide ranging impact on our attitudes to society values cosmology and knowledge. Eugenic Design Christina Cogdell, 2004 In 1939 Vogue magazine invited commercial designer Raymond Loewy and eight of his contemporaries including Walter Dorwin Teague Egmont Arens and Henry Dreyfuss to design a dress for the Woman of the Future as part of its special issue promoting the New York World's Fair and its theme The World of Tomorrow. While focusing primarily on her clothing and accessories many commented as well on the future woman's physique predicting that her body and mind would be perfected through the implementation of eugenics. Industrial designers' fascination with eugenics especially that of Norman Bel Geddes began during the previous decade and its principles permeated their theories of the modern design style known as streamlining. In Eugenic Design Christina Cogdell charts new territory in the history of industrial design popular science and American culture in the 1930s by uncovering the links between streamline design and eugenics the pseudoscientific belief that the best human traits could and should be cultivated through selective breeding. Streamline designers approached products the same way eugenacists approached bodies. Both considered themselves to be reformers advancing evolutionary progress through increased efficiency hygiene and the creation of a utopian ideal type. Cogdell reconsiders the popular streamline style in U.S. industrial design and proposes that in theory rhetoric and context the style served as a material embodiment of eugenic ideology. With careful analysis and abundant illustrations Eugenic Design is an ambitious reinterpretation of one of America's most significant and popular design forms ultimately grappling with the question of how ideology influences design.

Pennsylvania Farmer Consolidated with the Pennsylvania Stockman and Farmer, 1923 **Century of the Leisured Masses** David George Surdam, 2015 American living standards improved rapidly during the twentieth century. The rise of leisure both in terms of time allotted and in terms of consumption of leisure goods and services was astounding. When social critic Thorstein Veblen penned Theory of the Leisured Class Americans were just beginning to enjoy more and better leisure. In Century of the Leisured Masses David George Surdam explores the growing role played by leisure in the daily lives of Americans and what factors contributed to this change. **Inside OUT** Elizabeth McCormick, 2024-03-14 Inside OUT Human Health and the Air Conditioning Era focuses on the enclosed

environment of fully conditioned buildings revealing a unique ecosystem with broad implications for human life and a rapidly expanding global footprint Emphasizing the interconnections between buildings and human health equity and environmental sustainability it presents an interdisciplinary holistic analysis of the social behavioral and technological issues of indoor space Over the 20th century advances in mechanical conditioning technologies led to the dispersion and international dominance of the sealed building envelope which casually and progressively disconnected buildings and their occupants from local climatic biological and cultural environments At the same time humans were increasingly pushed indoors by less tangible socially constructed forces that associated climate control with cleanliness health social status and modernization In this volume a multi disciplinary group of experts on the indoor microbiome from the fields of biology anthropology and architecture come together to thoughtfully reflect on the history properties and meaning of indoor air quality in buildings and to discuss the future of human habitation with a dominant focus on human health in a post pandemic world Taking a human first approach to health and sustainability the authors weave together a compelling analysis of social and technological drivers of conditioned space with arguments for future interventions in the built environment Amid growing awareness of air quality and climate concerns Inside OUT provides a timely discussion of the relationship between building design and human health of relevance to professional and academic readers from across the spectrum of the building industry as well as fields including public health and environmental studies
