**As You Wish** Chelsea Sedoti, 2018-01-02 From bestselling author Chelsea Sedoti comes a thought provoking contemporary young adult book about a small desert town filled with Mojave magic where everyone gets to make a wish on their eighteenth birthday. If you could make one wish that was guaranteed to come true what would you wish for? Rules for Wishing Never let an outsider find out about wishing. Zip your lips and throw away the key. Wishes that would impact the world are off limits i.e. no bringing back the dinosaurs. Do no harm. Murder no bueno. No time travel. What's done is done pal. No bringing back the dead. Come on. You've seen what happens in THE WALKING DEAD. NEVER BREAK THE RULES. Seriously. We mean it. See Rule 7. There are always consequences. Most of Eldon's classmates have had their wishes picked out for months even years. Not Eldon. He's seen how wishing has hurt the people around him. His parents' marriage is strained, his sister is a virtual ghost in their house, his ex-girlfriend is dating his ex-friend, where does he even begin? One thing is for sure: Eldon has only twenty-six days to figure it out and the rest of his life to live with the consequences. Perfect for Readers who like magical realism. YA Fans of John Green, Jandy Nelson, and The Sun is Also a Star. Educators and parents who want to start conversations about consequences. People looking for young adult books best sellers. All while being easy to read and hard to put down. VOYA: VOYA

**Metaphor Studies: Theories, Methods, Approaches, and Future Perspectives** Ilaria Rizzato, Valentina Cuccio, Aletta Gesina Dorst, 2024-12-12 Metaphor has been studied as a linguistic, conceptual, and communicative phenomenon in a wide range of disciplines, including linguistics, literary studies, philosophy, education, political science, media studies, communication science, psychology, and neurosciences. While the Cognitive Theory of Metaphor has dominated the field since the cognitive turn in the 1980s, alternatives have been proposed, including the Neural Theory of Metaphor, the Relevance Theory Approach, the Complex Systems Approach, and the Dynamic Systems Approach. Though studies are still often text based, there is a growing body of research on visual metaphor, multimodal metaphor, and gestural metaphor, as well as experimental research ranging from studies on metaphor processing and comprehension to studies in NLP and machine learning. Metaphor Studies is thus a highly interdisciplinary field that encompasses a myriad of theories, approaches, and methods. In current metaphor research, each of these strands is facing new challenges and offering new venues of cutting-edge research using state-of-the-art technologies. Researchers tend to focus on their own research areas and provide in-depth

views within the scope of their own disciplines Metaphor Studies do not seem to escape this phenomenon in spite of the large number of disciplines they draw on ranging from linguistics to psychology to the theory of science Hence there seem to be little cooperation and communication across different fields methods and approaches having metaphors and figurative language as their main object of investigation This Research Topic aims to promote cross fertilization among the many research areas involved in Metaphor Studies thus bringing together different methods and perspectives and offering a comprehensive overview of the possible research scenarios
