## **Cloud Host Security Explained:**

Analysis of Security in cloud hosted Service & Self Hosted Services Dr. Ashad ullah Qureshi,2022-06-01 As more and more organizations consider moving their applications and data from dedicated hosting infrastructure which they own and operate to shared infrastructure leased from the cloud security remains a key sticking point Tenants of cloud hosting providers have substantially less control over the construction operation and auditing of infrastructure they lease than infrastructure they own Because cloud hosted infrastructure is shared attackers can exploit the proximity that comes from becoming a tenant of the same cloud hosting provider As a result some have argued that that cloud hosted infrastructure is inherently less secure than the self hosted infrastructure and that it will never be appropriate for high stakes applications such as health care or nancial transaction processing
