Chechnya The Case For Independence:

Chechnya Tony Wood,2020-05-05 The Case for Chechnya sharply criticizes the role of Western nations in their struggle and lays bare the weakness and shamefulness of the arguments used to deny the Chechens right to sovereignty Tony Wood considers Russo Chechen relations over the past century and a half as well as the fate of the region since the fall of the Soviet Union *Ethnic Conflict in the Post-Soviet World: Case Studies and Analysis* Leokadia Drobizheva,Rose Gottemoeller,Catherine McArdle Kelleher, Lee Walker,2015-04-08 Presents 16 case studies of ethnic conflict in the post Soviet world The book places ethnic conflict in the context of imperial collapse democratization and state building The Bewildered Herd B. A. Taleb,2004 For the first time a work that contains all that should be known about the media s orientation of the public mind in democratic societies why this manipulation takes place and in what manner The Bewildered Herd does not only analyse the media s current functions and forms in human society but it also traces and discusses the various transformations that this increasingly powerful social actor has gone through The case study used for the purposes of this work is both unequal and unique in its nature depth and revelations It compares the media s coverage in two of the world s leading democracies The United States and France of two of the world s most important armed conflicts and crises It analyses both countries national economic cultural and social interests as well as their respective media s coverage of these two conflicts and reveals how public perceptions are affected by this coverage and how the agendas of both the media and the political establishment is best served by this manipulation of public opinion in democratic societies Mechanisms and tactics used in conditioning the public are extensively revealed and analysed in a manner that is so comprehensive in its approach and in its explanations **Russia and the Right to Self-determination in the Post-Soviet Space** Johannes Socher,2021 This book shows that Russia has a distinct approach to the right to self determination that sets it apart from Western States and from Soviet state practice Drawing on analysis of seven secessionist conflicts and a detailed study of Russian sources it traces how Russian engagement with self determination has changed over the past three decades **The Economist** ,2007-03 **Why the Russian Constitution Matters** William Partlett,2024-09-19 This book tells the forgotten story of the dark arts of constitutional law by explaining how Russian President Vladimir Putin used particular rules in the 1993 Russian Constitution to build and safeguard his personal power Case Histories in International Politics Kendall W. Stiles,2002 Placing current developments in the proper historical framework Case Histories in International Politics makes senses of modern day problems and helps readers understand key concepts in the study of international relations Web addresses have been added to the end of each chapter and to the bibliography for direct access to government policy papers current economic statistics special interest group activities and more Four new cases SALT 1 and its Aftermath The Camp David Accords Sweatshops and the Global Factory and NGO s and the International Landmine Ban For those interested in international relations The Oxford Handbook of Law and Politics Keith E. Whittington,R. Daniel Kelemen,Gregory A.

Caldeira,2010-06-11 The study of law and politics is one of the foundation stones of the discipline of political science and it has been one of the most productive areas of cross fertilization between the various subfields of political science and between political science and other cognate disciplines This Handbook provides a comprehensive survey of the field of law and politics in all its diversity ranging from such traditional subjects as theories of jurisprudence constitutionalism judicial politics and law and society to such re emerging subjects as comparative judicial politics international law and democratization The Oxford Handbook of Law and Politics gathers together leading scholars in the field to assess key literatures shaping the discipline today and to help set the direction of research in the decade ahead Tulane Journal of International and Comparative Law ,1999 *The Tribune* ,2007 **The Fletcher Forum of World Affairs** ,2003

Small Nations and Great Powers Svante Cornell,2005-06-28 A thorough in depth analysis of the current and potential conflicts in the Caucasus including the geographical historical and ethno linguistic framework of the Caucasus the individual conflicts and the place of the Caucasus in world affairs *The North Caucasus* Anna Matveeva,1999 This book analyzes the political and economic development of the ethnic republics of the North Caucasus in post communist Russia and the prospects for greater stability in the region including the resolution of existing conflicts It assesses the main dilemmas for regional leaders and their policy responses The author studies the dynamics within the region overall between the republics of the Russian Federation and the Caucasus states as well as the main tendencies in relations between these republics and the Russian federal authorities The implications for security and the prospects for economic cooperation are emphasized Central Asian and Caucasian Prospects Series Contextualizing Secession Bruno Coppieters,Richard Sakwa,2003-07-17 In a world where the traditional territorial organisation of the state is coming under increasing challenge from pressures from above globalisation and from below struggles for federalisation and secession the theoretical and practical questions concerning secessionist struggles become ever more acute It is these questions that this volume addresses Why do some struggles for autonomy take acute forms above all violent struggles for secession for example Chechnya while others remain within the framework of constitutional politics for example Tatarstan and Quebec Under what conditions does a distinct political community have the right to secede from another and how should this process be managed Our ten case studies seek to answer these questions on the basis of the application of just war theory to the normative and practical issues concerning the secession struggles in these regions The Introduction sets out the theoretical issues and then each case study provides a rich mix of theoretical and empirical material and some of the broader issues are then drawn together in the concluding chapter The book focuses on four key themes that are central to the ethics of secession The first examines normative issues in particular the tension between choice theories and those based on remedial just cause arguments The second discusses the problem of violence in secessionist struggles and the ensuing relationship between just war theory and the ethics of secession The third problem is the relationship between nationhood and citizenship and in particular the

problem of applying what has now become a conventional distinction between ethnic and civic representations of the political community Finally the contentious issue of sovereignty and the way that it frames debates about self determination With each of these themes the application of general moral principles to particular historical contexts opens up new avenues of research This book is essential reading for those who wish to understand both the theoretical and practical issues concerning secession struggles in the world today *The Finnish Yearbook of International Law* ,1998 **The Borders of Islam** Stig Jarle Hansen,Atle Mesøy,Tuncay Kardas,2009 In *The Clash of Civilizations* Samuel Huntington argued that the borders between Western and Islamic civilizations would one day become the loci of cultural conflict The statements of Osama Bin Laden would seem to support this view This battle is not between al Qaeda and the U S he famously said in October of 2001 This is a battle of Muslims against the Global Crusaders These specially commissioned essays critically examine the virtual and actual borders of Islamic civilization Contributors concentrate on local dynamics and whether they support or contradict an emerging global confrontation between Islam and its Christian Hindu Buddhist and secular neighbors They consider borders that host Muslim majorities Afghanistan Bosnia Chechnya Ethiopia Indonesia Somalia Pakistan and Turkey those that have significant Muslim minorities Phillipines Nigeria and India and those that reflect new faultlines created by migration to France the United Kingdom the United States and Spain or by advances in technology Essays explore the rise of international Salafi jihadism and whether it can be traced to countries that straddle the Islamic and non Islamic world In conclusion the contributors argue that mechanisms far more complex than those described in Huntington s *Clash of Civilizations* influence many border regions suggesting that while poverty and institutional failure heighten religious awareness and practice the actual effects of these phenomena are entirely different *Strategic Studies* ,2004 **Index Islamicus** ,2007
