

# Chapter 11: Introduction to Genetics

## State Standards:

**Central Concepts:** Chromosomes allow for the storage and transmission of genetic information. They are a part of heredity because they are involved in the heritable transmission of traits, organisms, Chromosomes code for the specific functions of genes, which then produce characteristics for that organism.

1.1 Describe how basic structures (nucleus, nuclear membrane, nucleolus, DNA and RNA, chromosomes, centromeres, protein) of DNA, and describe the function in genetic inheritance.

1.2 Explain how mutations in the DNA sequence of a gene may or may not result in phenotypic change in an organism. Explain how mutations in genes may result in phenotypic changes in offspring.

1.3 Describe how inheritance patterns caused by several types of genetic traits (dominant, recessive, co-dominant, semi-lethal, polygenic, incomplete, multiple alleles).

1.4 Describe how Mendel's Law of Segregation and Independent Assortment can be observed through genetics and inheritance (e.g., Shirley bird crosses).

1.5 Use a Punnett Square to determine the probabilities for genotype and phenotype combinations in monohybrid crosses.

## View a Model for this Test:

1. Describe why Mendel chose to study garden peas.
2. Summarize Mendel's experimental design, including what traits he was following.
3. Illustrate that results of Mendel's experiments.
4. Explain genotype and phenotype characteristics of Mendel.
5. Summarize Mendel's Theory of Inheritance.
6. Explain the Law of Segregation, Law of Dominance, Law of Segregation and Law of Independent Assortment (and how they relate to monohybrid and dihybrid).
7. Use a Punnett Square and Diaphylic cross problems using Punnett squares.
8. Describe the role of probability in genetics.

Pediatric Critical Care Study Guide Steven E. Lucking, Frank A. Maffei, Robert F. Tamburro, Neal J. Thomas, 2012-04-10 This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner

Campbell,1987      *Introduction to Genetics* Sandra Pennington,2009-07-17 The 11th Hour Series of revision guides are designed for quick reference The organization of these

books actively involves students in the learning process and reinforces concepts. At the end of each chapter there is a test including multiple choice questions, true/false questions, and short answer questions, and every answer involves an explanation. Each book contains icons in the text indicating additional support on a dedicated web page. Students having difficulties with their courses will find this an excellent way to raise their grades. Clinical correlations or everyday applications include examples from the real world to help students understand key concepts more readily. Dedicated web page there 24 hours a day will give extra help, tips, warnings of trouble spots, extra visuals, and more. A quick check on what background students will need to apply helps equip them to conquer a topic. The most important information is highlighted and explained showing the big picture and eliminating the guesswork. After every topic and every chapter lots of opportunity for drill is provided in every format: multiple choice, true/false, short answer, essay. An easy trouble spot identifier demonstrates which areas need to be reinforced and where to find information on them. Practice midterms and finals prep them for the real thing.
