

# Fundamental Characteristics of Games

## Representation

- A game is a closed formal system that represents a subset of reality.
  - A game is complete and self-sufficient.
  - A game has rules, either explicit or implicit.
  - A game has a collection of parts that interact with each other, often in complex ways.
  - A game attempts to recreate or simulate some elements of reality, and allows fantasy to fill in the rest.

## Characteristics Of Games:

Characteristics of Games George Skaff Elias, Richard Garfield, K. Robert Gutschera, 2012-08-24 Understanding games whether computer games card games board games or sports by analyzing certain common traits Characteristics of Games offers a new way to understand games by focusing on certain traits including number of players rules degrees of luck and skill needed and reward effort ratio and using these characteristics as basic points of comparison and analysis These issues are often discussed by game players and designers but seldom written about in any formal way This book fills that gap By emphasizing these player centric basic concepts the book provides a framework for game analysis from the viewpoint of a game designer The book shows what all genres of games board games card games computer games and sports have to teach each other Today s game designers may find solutions to design problems when they look at classic games that have evolved over years of playing Characteristics of Games written by three of the most prominent game designers working today will serve as an essential reference for game designers and game players curious about the inner workings of games It includes exercises which can also serve as the basis for discussions and examples chosen from a wide variety of games There are occasional mathematical digressions but these can be skipped with no loss of continuity Appendixes offer supplementary material including a brief survey of the two main branches of mathematical game theory and a descriptive listing of each game referred to in the text
