Community Favorite Biohacking Manual:

Biohacking, Bodies and Do-It-Yourself Mirjam Grewe-Salfeld, 2021-11-05 From self help books and nootropics to self tracking and home health tests to the tinkering with technology and biological particles biohacking brings biology medicine and the material foundation of life into the sphere of do it yourself This trend has the potential to fundamentally change people's relationship with their bodies and biology but it also creates new cultural narratives of responsibility authority and differentiation Covering a broad range of examples this book explores practices and representations of biohacking in popular culture discussing their ambiguous position between empowerment and requirement promise and prescription

Biohackers Magazine Issue 9 Biohackers Magazine , The importance of continual self improvement and development cannot be understated especially in the world of biohacking But there is also something that cannot be overstated in this same realm of personal health and growth and that is the vital role that women play Often argued and affirmed as the more intuitive of the 2 sexes women have and continue to push themselves and their community towards their health wellness and wisdom goals In a lot of ways men have it easy Our bodies instruction manual is comparable to a generic IKEA coffee table's guided instructions not a lot to decipher But some could compare women's bodies manuals to NASA's rocket construction directions a lot of steps and A LOT to understand Granted the woman's body is easily the more attractive of the two in my opinion and I want it to be clear that although this statement is bias I mean this as a more aesthetic art like manner The symmetry the intricacy the mysteriousness the gracefulness just the way everything connects Perhaps its because of this clear advantage in the beauty category that it takes a lot to master all the processes within it It once was said that in the beginning God first made man but then afterwards he took a long look at him and then told himself I can do better than that and then made woman Women are at the forefront of biohacking and its clear that the industry would not be where it is today without them Due to women having to figure out all of their complexities but also having the tenacity and courage to do so they have stood side by side with men and helped to share the helpful and needed knowledge of health optimization with the world It is with great pleasure and respect that we dedicate this issue to all of the women in the world striving to promote good health strong lives and clearer minds Although we have had and will continue to have female authors and subject matter in past and future issues every article contained inside this particular issue is either written by a female author or purely feminine in subject matter This is our way to take a moment to highlight and thank all those women out there doing their thing At Biohackers Magazine we believe no we know that every woman's thought and word is just as important as every man's And we are here to provide this magazine as the ontic evidence to that Without further ado enjoy your new womanful issue

The Unnatural Selection of Our Species Torill Kornfeldt, 2024-07-09 In 2018 the first genetically modified children were born Now we have the tools to reshape the future of our species With a pair of genetic scissors known as CRISPR we can select the traits of our children avoid ageing or cure disease With that ability comes new risks forcing us to

face hard ethical questions Torill Kornfeldt has travelled the world to meet the people driving this research forward She has visited fertility clinics in South Korea oncologists in China who are experimenting on sick patients and biohackers in the US who want to make the new technology available to everyone In *The Unnatural Selection of Our Species* she asks How can we handle these new tools that could change our genetic material Well written knowledgeable and engaging exactly how really good popular science is supposed to be Gustav K llstrand Nobel Centre Torill Kornfeldt is a Swedish science journalist with a background in biology She has worked in the science department of Sweden s leading morning newspaper Dagens Nyheter and at the science branch of the Swedish public radio There she created the successful radio show Tekniksafari Tech Safari on new technology changing society Her main focus is on how emerging bioengineering and technology will shape our future
