Current Trends in Global Education: Bridging K-12 and Higher Education for an Interconnected World MARINA FALASCA, KARINA J. BAUM, 2024-10-10 *Current Trends in Global Education Bridging K 12 and Higher Education for an Interconnected World* explores the evolving landscape of global education through insights from esteemed educators and researchers. It defines global education and presents multiple rationales for developing global competence along with a literature review of significant challenges over the past two decades. The anthology showcases innovative K 12 practices, emerging trends, and the transformative role of transnational telecollaboration and artificial intelligence (AI) in fostering global citizenship and cross-cultural communication. It also examines higher education focusing on novel pedagogical tools, hybrid learning communities, and virtual exchange initiatives in ESP/EAP courses, as well as key factors affecting AI adoption in this context. Concluding with future directions, the collection emphasizes the need for collaboration across educational levels to prepare learners to thrive in a globally connected world, making it an essential resource for educators, policymakers, and scholars aiming to bridge K 12 and higher education while reimagining global education. Maria Montessori's Erdkinder Ela Eckert, 2022-10-01 Consistently based on the developmental needs in adolescence, Maria Montessori designed the concept of a Center for Study and Work in the Countryside for students aged 12-18 years, which gives young people the opportunity to learn about the basic structures of production, trade, and services in a manageable, transparent, and at the same time protected setting through Practice Theory-linked experiences. The book presents the basics of Maria Montessori's concept and gives, through reports with practitioners and interviews with Montessori experts, insights into authentic implementations of the Farm school concept and thus into a learning arrangement that allows young people a high degree of responsibility and participation and strengthens their commitment to a sustainable approach to natural resources and a peaceful way of living. The book also addresses schools without a Farm school practice and shows ways of approaching crucial components of this authentic and highly topical concept. **The 9th Annual International Seminar on Trends in Science and Science Education (AISTSSE) 2022**, 2023-10-04 This is the ninth time we are hosting this seminar, and we are proud to inform you that this seminar is an annual event in our calendar and has been held every year since 2014.
