12 Months Danny Samson, Timothy Donnet, Richard L. Daft, 2017-10-25 Samson Daft Donnet's Management is a robust foundation text providing a balance of broad theoretical content with an engaging easy to understand writing style. It covers the four key management functions: planning, organising, leading, and controlling, conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media, and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real life local and international examples showcase the ongoing changes in the management world. Focusing on a skills approach, they bring concepts to life for students, supporting motivation, confidence, and mastery. Each part concludes with a contemporary continuing case study focusing on car company Toyota as it faces managerial challenges and opportunities in the region.

Environmental Science Scott Brennan, 2004-03 This comprehensive study guide features chapter outlines, key terms, practice exercises, and answers and solutions to selected end of chapter questions from the text. Additional suggestions for approaching environmental issues encourage students to think critically.

Understanding Student Participation and Choice in Science and Technology Education Ellen Karoline Henriksen, Justin Dillon, Jim Ryder, 2014-09-17 Drawing on data generated by the EU's Interests and Recruitment in Science IRIS project, this volume examines the issue of young people's participation in science, technology, engineering, and mathematics education. With an especial focus on female participation, the chapters offer analysis, deploying varied theoretical frameworks including sociology, social psychology, and gender studies. The material also includes reviews of relevant research in science education and summaries of empirical data concerning student choices in STEM disciplines in five European countries. Featuring both quantitative and qualitative analyses, the book makes a substantial contribution to the developing theoretical agenda in STEM education. It augments available empirical data and identifies strategies in policy making that could lead to improved participation and gender balance in STEM disciplines. The majority of the chapter authors are IRIS project members, with additional chapters written by specially invited contributors. The book provides researchers and policy makers alike with a comprehensive and authoritative exploration of the core issues in STEM educational participation.
