*Practical Pharmaceutical Laboratory Automation* Brian D. Bissett, 2003-05-23 Laboratory automation is an increasingly important part of the job description of many laboratory scientists. Although many laboratory scientists understand the methods and principles involved in automation, most lack the necessary engineering and programming skills needed to successfully automate or interface equipment in the lab. A step by step how to reference and guide *Practical Pharmaceutical Laboratory Automation* explores the processes needed to automate the majority of tasks required in research today. The author discusses topics ranging from automated mathematical analysis to robotic automation of chemical processes to combinations of these and other processes. He presents a detailed discussion of high throughput screening and assay development and takes an in depth look at Visual Basic as the primary programming language used in laboratories. The text has a dedicated web site <http://www.pharmalabauto.com> that contains all the sample code and examples contained within the text as well as other information related to laboratory automation. Providing a starting point for tackling automation problems, *Practical Pharmaceutical Laboratory Automation* helps you develop a strategy for automation that gets consistent results.

Kitson, 2011-05-17 The second edition of *Gas Chromatography and Mass Spectrometry: A Practical Guide* follows the highly successful first edition by F. G. Kitson, B. S. Larsen and C. N. McEwen, 1996, which was designed as an indispensable resource for GC/MS practitioners regardless of whether they are a novice or well experienced. The Fundamentals section has been extensively reworked from the original edition to give more depth of an understanding of the techniques and science involved with GC/MS.
