

# 7th Grade Math Common Core Standards

Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units.

7.RP.A.1

Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers represented as fractions and as decimals on a horizontal or vertical number line diagram.

7.NS.A.1

Apply properties of operations to strategies to add, subtract, factor, and expand linear expressions with rational coefficients.

7.EE.A.1

Recognize and represent proportional relationships between quantities.

7.RP.A.2

Describe situations in which opposite quantities combine to make 0. For example, a hydrogen atom has 0 charge because its two constituents are oppositely charged.

7.NS.A.2c

Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related.

7.EE.A.2

Solve problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale.

7.G.A.1

Understand that statistics can be used to gain information about a population by examining a sample of the population; generalizations about a population from a sample are valid only if the sample is representative of that population; that random sampling tends to produce representative samples and supports valid inferences.

7.SP.A.1

Draw (fertilized)卵母细胞 and practice identifying shapes with given conditions based on constructing triangles from three measures of angles or sides, including when the conditions indicate that the triangle is not unique.

7.G.A.2

Use data from a random sample to draw inferences about a population with an unknown characteristic of interest. Generating multiple samples for simulated samples of the same size to compare the variation in estimates or predictions.

7.SP.A.2
