With the added food combining in DDP Yoga Phase Three, these must be eaten in the order shown. (While I have listed a Complex Carbohydrate and a Protein at each meal, for fastest weight loss, select either a Complex Carbohydrate OR Protein at each meal. Best scenario, select the Complex Carbohydrate at breakfast, then have Protein for lunch and dinner. This really rockets your results!)

WATER

All living things must have water to survive. While people can live without foods for days, even months, we cannot survive without water for more than a few days!

Why is water so important to our bodies?

Water is the main ingredient in the fluids of the bodies' systems. Fluids travel through your body, carrying nutrients and waste to and from all your cells and organs. Water also keeps your joints lubricated.

Water is essential in the digestive process. Starting in the mouth, saliva is made mostly of water, and it helps break down food in the mouth. Then your digestive juices are made mostly of water to keep things moving properly.

Meet the Food Radicals F. Bailey Norwood, Tamara L. Mix, 2019-02-27 The food system has changed considerably in the last century Horsepower was replaced by machine better crop breeding programs helped usher in the Green Revolution and problems of malnutrition began to run parallel with those of obesity Despite changes many of the problems we face remain the same Farms continue to lose soil and low income households still have difficulty acquiring healthy food Add to these challenges a host of new ones Globalization has caused some agricultural communities to feel threatened Everyone recognizes problems of malnutrition obesity and food sustainability but many disagree on solutions One thing is certain confronting both familiar and new challenges will lead to radical changes in the food system Though the exact form of radical change is unknown this book looks to a host of candidates by interviewing the people who champion them We are winning the battle against soil erosion through new no till farming methods Progress is being made in food sustainability by a spectrum of new innovations but also a return to traditional farming techniques New innovations include robots on the farm advances in molecular biology and alternative protein sources As we embrace the farming strategies of our ancestors we see farms returning to polycultures local food systems and food sovereignty This book gains insight from interviews with twenty seven individuals who are either creating or proposing radical changes in how food is produced and distributed An eclectic group ranging from farmers to activists to spiritual gurus they are the most interesting people you have never met By getting to know each radical personally we can better access their voices and visions to understand both the problems and likely solutions to today s most pressing food problems
