A Light Unto My Path JAY R. LEACH, 2013-08-27 Many congregations and church leaders are faced with the collapse of the institutional church culture in America A great number of them have retreated inside their four walls and created church activities to replace their Christ given mission to make disciples and thereby extending His kingdom on earth thy kingdom come Abandoning their mission means they have abandoned their real identity and reason for existence Others have gone to the other extreme by selling out to the culture Their worship service is a form of entertainment with the objective to feel good and be happy Both choices have turned off many saved people and they have left the church In 1998 a Barna poll reflected that 20 million born again Christians had withdrawn their membership Todays poll shows an increase to 115 000 million Many are out there striving to reboost the churchs lost mission to make disciples and thy kingdom come God has not changed His mind

Krause, 2004-05 The examination and interpretation of tissue sections seen under the light microscope in a laboratory setting is an example of student directed independent problem solving The proper reading of a histologic section is an acquired art that can only be developed through practice close observation and repetition This laboratory manual was designed as a guide for students to

aid them in this endeavor. The laboratory study guide manual was designed to be used as a supplement to any current textbook and or atlas of Histology. Learning objectives provide the overall goals for each chapter. The narrative of the study guide explains how to systematically breakdown, examine and interpret each tissue and or organ encountered without regard to a given histologic slide from a specific slide collection. Thus this systematic method can be used to examine and interpret histologic preparations from any collection or of any species. The student is encouraged to sketch, label and create a personalized atlas while using this laboratory manual as a guide. The vocabulary that should be developed and used during the laboratory can be found quickly by going to the bold face type in the appropriate segment of the text. Each chapter contains one or more tables in which key structures used in the identification of a tissue/organ are presented, offering the briefest possible summary of important histologic features. As a final short review, an appendix provides summary tables that compare and contrasts the basic differences of several structures that are somewhat similar in general architecture.
