## Common Language Electrical Engineering Writings:

*A Common Language for Electrical Engineering* Eric Dollard, 2015-12-04 Eric Dollard is a legendary electrical engineer trained by RCA Bell Labs and the US Navy. He is the only man alive to have successfully replicated Nikola Tesla's wireless electricity technology and is considered to be the modern living Tesla. Because of his contribution to electrical science and his advancements in a Tesla Alexanderson type of Advanced Seismic Warning System the Federal Government's documents in relation to this project refer to him as Dr Eric Dollard which confers to him an honorary PhD. His fans lovingly refer to him as Professor Dollard. The Lone Pine Writings Part 1 and its content was developed out of the general frustration of the author when trying to teach others about his work in electrical engineering. This collection of papers started appearing in discussion threads on Energetic Forum around 2011. At the time Eric Dollard was living in his famous 1980 Toyota Corolla in the harsh wastelands of Lone Pine California. Originally Eric wrote the material out on paper and mailed it to a colleague who transcribed the material and posted it in the forums under the pseudonym T REX. Each paper or letter was called a transmission in honor of the language of a radio operator and contained information on specific electrical engineering terms and how they are to be used. The original format of the material is retained in this edition of the book. The phenomena we call electricity is a dynamic but artificial presentation of the Natural World and because of this its behavior follows specific rules. Understanding these specific behaviors is the key to engineering this phenomena but developing a common language with which to describe these behaviors is the key to teaching others these engineering skills. The purpose of this book is to provide clarity for the electrical engineering community regarding the use of common terms for electrical units. The last attempt to standardize this language was made by Oliver Heaviside over 100 years ago and his effort was met by censure from the Royal Society of London. It is hoped that the release of this book will be met with a more enlightened response.
