

## **Chapter 19 Active Reading Guide**

### **Descent with Modification**

As you study this chapter, read several paragraphs at a time to catch the flow of ideas and understand the reasoning that is being described. In some places, the text describes a narrative or story of events that led to Darwin's theory of evolution. Therefore, first read the narrative to absorb the big picture and then return to answer the few questions that accompany this material.

#### **Overview**

1. Define evolution broadly and then give a narrower definition, as discussed in the overview.

Descent with modification- living species are descendants of ancestral species different from present-day ones. Evolution is the change in genetic composition of a population between generations.

#### **Section 1**

This section takes a look at the historical setting and influences on Darwin, and it sets the stage for our formal study of evolution.

2. How did each of the following sources view the origin of species?

**Aristotle and Scala Naturae:** viewed species as fixed, recognized "affinities" among organisms and concluded that life forms could be arranged on a ladder/ scale of increasing complexity (scala naturae)

**The Old Testament:** perfect via intelligent design

**Carolus Linnaeus:** nested classification system grouping similar species into increasingly general categories; similarities between species not related to evolutionary kinship but to pattern of creation

3. Explain the role of fossils in rock strata as a window to life in earlier times.

Many fossils are in sedimentary rocks formed from settled sand/mud at seas/lakes/ swamps. New sediment layers to cover/compress old ones into rock layers (strata); fossils in some strata help show some organisms on Earth when they were formed.

4. How would Georges Cuvier have explained the appearance of the record of life shown in
