**Model Railway Design Manual** C. Freezer, 1996-11-02 Before beginning construction work on a model railway it is essential to have a workable design. The plan needs to take into account the space time budget and personal skills available as well as the type of railway to be modelled. Here Cyril Freezer draws on more than 50 years experience in designing and building model railways to explain how each stage should be undertaken. Includes 150 specially drawn track layout diagrams.

**Design Manual for the Swiss Federal Railways** Josef Müller-Brockmann, Andres

Janser, 2019 In 1980 Josef Müller Brockmann laid the cornerstone for a uniform visual identity for the Swiss Federal Railways

SBB with his legendary Visual Information System at Train Stations and Stops. In view of Switzerland's multilingualism the manual proposed a signage system that largely did without language with his functional typography the pioneer of Swiss graphics conceived an intuitively comprehensible signage system for use throughout the country to also guide passengers unfamiliar with the terrain to their destination with the help of pictograms. The visual concept was developed in dialogue with the SBB and still dominates the railways visual identity even today. Müller Brockmann's manual greatly expanded in 1992 and given the title Passenger Information System is a prime example of a complex design project that succeeds through extreme rationality and consistency. It thus serves as a compass for designers worldwide in their daily work. This reprint with an English translation makes the manual accessible for the first time to a broader public. Andres Janser examines the project in the context of Müller Brockmann's conceptual work and the systematic international design for which railways everywhere were striving during the period.
