Francis explores how one of the most fundamental instructional strategies, questioning, can provide the proper scaffolding to deepen student thinking, understanding, and application of knowledge. You'll learn techniques for using questioning to extend and evaluate student learning experiences. Eight different kinds of questions that challenge students to demonstrate higher order thinking and communicate depth of knowledge. How to rephrase the performance objectives of college and career readiness standards into questions that engage and challenge students. Francis offers myriad examples of good questions across content areas and grade levels, as well as structures to help teachers create and use the different kinds of questions.
