bodies of water The damage done to these water vessels cost a lot of money in repairing it The river is now clean due to the recent efforts of the Pasig River Rehabilitation Commission Having a clean river doesn't mean that it will stay like that forever a viable solution is having an automated trash detection on the surface of the water These can be a way to minimize water debris and pollution The detected trash can be documented on a weekly basis and notify the local government if there is an alarming increase in trash on the surface of the water
