**Vector Network Analyzer (VNA) Measurements and Uncertainty Assessment** Noshewan Shoaib, 2016-09-22 This book describes vector network analyzer measurements and uncertainty assessments particularly in waveguide test set environments in order to establish their compatibility to the International System of Units SI for accurate and reliable characterization of communication networks It proposes a fully analytical approach to measurement uncertainty evaluation while also highlighting the interaction and the linear propagation of different uncertainty sources to compute the final uncertainties associated with the measurements The book subsequently discusses the dimensional characterization of waveguide standards and the quality of the vector network analyzer VNA calibration techniques The book concludes with an in depth description of the novel verification artefacts used to assess the performance of the VNAs It offers a comprehensive reference guide for beginners to experts in both academia and industry whose work involves the field of network analysis instrumentation and measurements

**Ultrafast nonlinear silicon waveguides and quantum dot semiconductor optical amplifiers** Thomas Vallaitis, 2014-09 In this book nonlinear silicon organic hybrid waveguides and quantum dot semiconductor optical amplifiers are investigated Advantageous applications are identified and corresponding proof of principle experiments are performed Highly nonlinear silicon organic hybrid waveguides show potential for all optical signal processing based on fourwave mixing and cross phase modulation Quantum dot semiconductor optical amplifiers operate as linear amplifiers with a very large dynamic range
