[Social Survey Programme 1984-2009](#) Max Haller, Roger Jowell, Tom W. Smith, 2009-09-11. The social sciences rely more on the comparative method than on experimental data mainly because the latter is difficult to acquire amongst human populations. The International Social Survey Programme has played a pioneering role in creating and sustaining methodologically sophisticated mass attitude surveys across the globe. Starting in 1984 with five nations, it now encompasses forty-five nations spread over five continents, each administering an identical annual survey to a random sample of their population. Analyses of the data or descriptions of the methodology already appear in over 3,000 publications. This book contains new contributions from three dozen eminent scholars who analyse and compare the perceptions and attitudes of citizens across all five continents, nations, and over time. Subjects range from inequality and the role of the state, ethnic, national, and global identities, the changing relevance of religion, beliefs and practices, gender roles, family values, and work orientations, household and

society Some chapters focus on methodological issues others focus on substantive findings This book sets new standards for cross cultural research *The Congregationalist and Christian World* ,1914 A Guide to Evidence-based Integrative and Complementary Medicine Vicki Kotsirilos,Luis Vitetta,Avni Sali,2011-01-25 The must have integrative and complementary medicine reference from experts in the field This exhaustive textbook is ideal for anyone with an interest in integrative and complementary medicine in Australia including General Practitioners medical students integrative clinicians and health practitioners A Guide to Evidence based Integrative and Complementary Medicine presents non pharmacologic treatments for common medical practice complaints all supported by current scientific evidence These include Attention Deficit Hyperactivity Disorder ADHD asthma insomnia anxiety depression and many more This practical health resource profiles myriad approaches in integrative and complementary medicine such as mind body medicine stress management techniques dietary guidelines exercise and sleep advice acupuncture nutritional medicine herbal medicine and advice for managing lifestyle and behavioural factors It also looks at complementary medicines that may impact the treatment of disease A Guide to Evidence based Integrative and Complementary Medicine contains only proven therapies from current research particularly Cochrane reviews systematic reviews randomised control trials published cohort studies and case studies easy access to evidence based clinical data on non pharmacological treatments including complementary medicines for common diseases and conditions instant advice on disease prevention health promotion and lifestyle issues chapter summaries based on scientific evidence using the NHMRC guidelines grading system printable patient summary sheets at chapter end to facilitate discussion of clinical management conveniently organised by common medical presentations
