It outlines a design process based on systems thinking and developed for a lifecycle or regenerative based approach. It also presents strategies, tools, and guidelines that enable informed decisions on planning, designing, budgeting, constructing, maintaining, marketing, and increasing the sustainability of this re-invented cityscape. Case studies demonstrate the environmental, economic, and social value of these landscapes and reveal paths to a greener and healthier urban environment. This unique and indispensable guide details how to plan, design, fund, construct, and leverage the sustainability aspects of the edible landscape typology. Covers over a dozen typologies including community gardens, urban farms, edible estates, green roofs and vertical walls, edible school yards, seed to table food landscapes within parks, plazas, streetscapes, and green infrastructure systems, and more.
