Digital Literature and Critical Theory Annika Elstermann, 2022-12-27. The aim at the core of this book is a synthesis of increasingly popular and culturally significant forms of digital literature on the one hand and established literary and critical theory on the other reading digital texts through the lens of canonical theory but also reading this more traditional theory through the lens of digital texts and related media. In a field which has often regarded the digital as apart from traditional literature and theory this book highlights continuities in order to analyse digital literature as part of a longer literary tradition. Using examples from social media to video games and works particularly by postmodern and poststructuralist theorists Digital Literature and Critical Theory contextualises digital forms among their analogue precursors and traces ongoing social developments which find expression in these cultural phenomena including power dynamics between authors and readers the individual in post modernity consumerism and the potential for intersubjective exchange. Making Thought Visible Curt Hersey, Julie D. O'Reilly, 2025-07-18 For viewers who experience autism, bipolar disorder, depression, obsessive-compulsive disorder, or other cognitive variations, television storytelling offers opportunities to empathize with characters portraying neurodiversity. In this first collection of its kind, contributors analyze television's increasing attempts to make thought how individuals process the world around them visible. Examined themes include the muting of neurodiverse voices, madness as power, diagnosis vs. lived experience, dual diagnosis, reactions to atypical behaviors, the cultivation of attitudes towards autistic individuals, and translanguaging across global series. Programs include Young Sheldon, The Good Doctor, Legion, the Star Trek universe, Euphoria, True Detective, Girls, Bungo, Stray Dogs, and Love on the Spectrum. Varied theoretical and methodological approaches and attention to the quality and verisimilitude of neurodiverse representations result in an appropriately complex analysis.

Winchester in the Early Middle Ages Frank Barlow, 1976 London and Winchester were not described in the Domesday Book but the royal properties in Winchester were surveyed for Henry I about 1110 and the whole city was surveyed for Bishop Henry of Blois in 1148. These two surveys survive in a single manuscript known as the Winton Domesday and constitute the earliest and by far the most detailed description of an English or European town of the early Middle Ages. In

the period covered Winchester probably achieved the peak of its medieval prosperity From the reign of Alfred to that of Henry II it was a town of the first rank initially centre of Wessex then the principal royal city of the Old English state and finally capital in some sense but not the largest city of the Norman Kingdom In this book a team of scholars from Britain and Sweden centred on the Wincheste Research Unit have undertaken a full edition translation and analyses of the surveys and of the city they depict Drawing on the evidence derived from archaeological excavation and historical research in the city since 1961 on personal and place name evidence and on the recent advances in Anglo Saxon numismatics they provide an unparalleled account of one of the principal European cities of the eleventh and twelfth centuries
