12.5.13 Packet Tracer - Troubleshoot Enterprise Networks Answers

Objectives

- Part 1: Verify Switching Technologies
- Part 2: Verify DHCP
- Part 3: Verify Routing
- Part 4: Verify WAN Technologies
- Part 5: Verify Connectivity

Scenario

This activity uses a variety of technologies that you have encountered during your CCNA studies, including IPv4 routing, IPv6 routing, port security, EtherChannel, DHCP, and NAT. Your task is to review the requirements, isolate and resolve any problems, and then document the steps you took to verify the requirements.

The company replaced routers R1 and R3 to accommodate a fiber connection between the locations. Configurations from the previous routers with serial connections were modified and applied as a starting configuration. IPv6 is being tested on a small portion of the network and needs to be verified.

Note: Passwords have been removed for ease of troubleshooting in this exercise. The typical password protections should be reapplied; however, the activity will not grade those items.
