The Barnett Ziegler Byleen and Sobecki College Algebra series is designed to be user friendly and to maximize student comprehension by emphasizing computational skills, ideas, and problem solving as opposed to mathematical theory. Suitable for either one or two semester college algebra with trigonometry or precalculus courses. Precalculus introduces a unit circle approach to trigonometry and includes a chapter on limits to provide students with a solid foundation for calculus concepts. The large number of pedagogical devices employed in this text will guide a student through the course. Integrated throughout the text, students and instructors will find Explore Discuss boxes which encourage students to think critically about mathematical concepts. In each section, the worked examples are followed by matched problems that reinforce the concept being taught. In addition, the text contains an abundance of exercises and applications that will convince students that math is useful. A MathZone site featuring algorithmic exercises, videos, and other resources accompanies the text. Combo: College Algebra with Student Solutions Manual Raymond Barnett, 2010-02-11. The Barnett Ziegler Byleen Sobecki College Algebra series is designed to give students a solid grounding in pre-calculus topics in a user friendly manner. The series emphasizes computational skills, ideas, and problem solving rather than theory. Explore Discuss boxes integrated throughout each text encourage students to think critically about mathematical concepts. All worked examples are followed by Matched Problems that reinforce the concepts being taught. New to these editions, Technology Connections illustrate how concepts that were previously explained in an algebraic context may also be solved using a graphing calculator. Students are always shown the underlying algebraic methods first so that they do not become calculator dependent. In addition, each text in the series contains an abundance of exercises, including numerous calculator based and reasoning and writing exercises, and a wide variety of real world applications illustrating how math is useful. *Concepts of Calculus with Applications* Martha Goshaw, 2007-09-10.
