Chemical Technology and Analysis of Oils, Fats, and Waxes, Vol. 2 of 3 (Classic Reprint) Julius Lewkowitsch, 2017-10-28
Excerpt from *Chemical Technology and Analysis of Oils Fats and Waxes Vol 2 of 3* Oils and fats serve the human race as one of the most important articles of food Hence Operations having for their object the preparation of Oils and fats date back to the remotest times in the history of mankind The cave dweller who first collected the fat dripping from the deer on the roasting spit may be considered as the first manufacturer Of tallow just as the inhabitant of a tropical country who first collected the Oil which ran Off the broken kernel of the cocoa nut on exposure to the sun may be looked upon as the first manufacturer of vegetable oils or fats The technical appliances used for the production of Oils and fats therefore range from the simplest contrivances up to the very elaborate machinery in vogue at present Some of the oldest appliances still survive to day such as the extremely primitive methods employed in the production Of palm Oil the expression of olives the boiling out of blubber etc The first supplies of vegetable Oils and fats were no doubt Obtained from fruits such as those of the palm and Olive trees The Oils were recovered in an exceedingly crude fashion either by storing the fruits for some time in holes in the ground when fermentation of the mass set in and the oil rose to the surface or by boiling the fruit in water An advance in the manufacture was reached with the expression of oils from fruits in some kind of a rough press exemplified by packing the fruit into sacks and covering these with boards weighted by stones A further stage was marked by the production of vegetable oils from oleaginous seeds these were originally ground up between stones as is still being done at present in East India The latest development is indicated by the processes involving the extraction with solvents About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections
