**Higher Education in Nepal** Krishna Bista, Shyam Sharma, Rosalind Latiner Raby, 2019-08-19 This book presents a showcase of discussions and critical perspectives about Nepalese higher education. Its chapters cover topics such as the impacts of local sociopolitical changes and global forces on public and private education, emerging online and distance education, administrative and intellectual leadership, quality assessment, graduate employability, global mobility of students, and the contributions of the global diaspora of Nepalese scholars. The central questions of the book are: What are some of the local and global academic interactions in Nepalese higher education and what are the current challenges and pathways for advancements and improvements? How can Nepalese higher education absorb twenty-first century values of quality education as external forces while adapting new developments to local needs? How can scholars interested in Nepalese, South Asian, and international higher education create opportunities for scholarship and professional collaboration around research on higher education in this region of South Asia? What issues and perspectives can research and scholarship about Nepal's higher education offer to international discourse in higher education? The book offers information and resources to international educators interested in the dynamics of Nepalese and, by implication, South Asian higher education, by introducing key challenges in policy and programs, innovative changes in curricula, effective approaches in technology application, and strategies for future integration of global reforms in education.
