**Solutions Guide for Chemistry** Steven S. Zumdahl, Kenneth C. Brooks, 1989      **Chemical Solution Deposition of Functional Oxide Thin Films** Theodor Schneller, Rainer Waser, Marija Kosec, David Payne, 2014-01-24 This is the first text to cover all aspects of solution processed functional oxide thin films Chemical Solution Deposition CSD comprises all solution based thin film deposition techniques which involve chemical reactions of precursors during the formation of the oxide films i.e. sol gel type routes metallo organic decomposition routes hybrid routes etc. While the development of sol gel type processes for optical coatings on glass by silicon dioxide and titanium dioxide dates from the mid 20th century the first CSD derived electronic oxide thin films such as lead zirconate titanate were prepared in the 1980s. Since then CSD has emerged as a highly flexible and cost effective technique for the fabrication of a very wide variety of functional oxide thin films. Application areas include for example integrated dielectric capacitors ferroelectric random access memories pyroelectric infrared detectors piezoelectric micro electromechanical systems antireflective coatings optical filters conducting transparent conducting and superconducting layers luminescent coatings gas sensors thin film solid oxide fuel cells and photoelectrocatalytic solar cells. In the appendix detailed cooking recipes for selected material systems are offered.
