The Mathematical Foundation of Multi-Space Learning Theory Tai Wang, Mengsiying Li, 2024-03-12 This book explores the measurement of learning effectiveness and the optimization of knowledge retention by modeling the learning process and building the mathematical foundation of multi-space learning theory. Multi-space learning is defined in this book as a micro process of human learning that can take place in more than one space with the goal of effective learning and knowledge retention. This book models the learning process as a temporal sequence of concept learning drawing on established principles and empirical evidence. It also introduces the matroid to strengthen the mathematical foundation of multi-space learning theory and applies the theory to vocabulary and mathematics learning respectively. The results show that for vocabulary learning the method can be used to estimate the effectiveness of a single learning strategy to detect the mutual interference that might exist between learning strategies and to predict the optimal combination of strategies. In mathematical learning it was found that timing is crucial in both first learning and second learning in scheduling optimization to maximize the intersection effective interval. The title will be of interest to researchers and students in a wide range of areas including educational technology learning sciences mathematical applications and mathematical psychology.

Formal Modeling and Analysis of Timed Systems Laure Petrucci, Jeremy Sproston, 2023-08-28 This book constitutes the refereed proceedings of the 21st International Conference on Formal Modeling and Analysis of Timed Systems (FORMATS 2023) held in Antwerp, Belgium, in September 2023. The 9 full papers presented in this book were carefully reviewed and selected from 21 submissions. The proceedings also contain one invited paper in full paper length. The papers deal with real-time issues in hardware design, performance analysis, real-time software scheduling, semantics, and verification of real-time hybrid and probabilistic systems.

Quantum Artificial Intelligence with Qiskit Andreas Wichert, 2024-01-26 Quantum Artificial Intelligence (QAI) is a new interdisciplinary research field that combines quantum computing with Artificial Intelligence (AI) aiming to use the unique properties of quantum computers to enhance the capabilities of AI systems. Quantum Artificial Intelligence with Qiskit provides a cohesive overview of the field of QAI, providing the tools for readers to create and manipulate quantum programs on devices as accessible as a laptop computer. Introducing symbolical quantum algorithms, sub-symbolical quantum algorithms, and quantum Machine Learning (ML) algorithms, this book explains each process step by step with associated Qiskit listings. All examples are additionally available for download at <https://github.com/andrzejwichert/qai>. Allowing readers to learn the basic concepts of quantum computing on their home computers, this book is accessible to both the general readership as well as students and instructors of courses relating to computer science and AI.
