Troutbeck, Michael Kyte, 2020-06-03 Traffic Operations at Intersections Learning and Applying the Models and Methods of the Highway Capacity Manual Chapters on all way stop controlled intersections two way stop controlled intersections and signalized intersections Designed for practicing transportation engineers and university seniors and graduate students 11 simplified scenarios to open up your understanding of the HCM 43 example calculations that are fully worked out and explained in detail 7 computational engines that allow you to see inside and then apply the models 138 figures to clearly illustrate concepts Additional problems online The models of the Highway Capacity Manual HCM are often the engineer's choice to analyze intersection performance These models are complex and nearly all transportation engineers use software implementations of these models to conduct their analyses Software applications are powerful tools that help engineers solve problems But these applications also serve as barriers to the understanding of the complex models embedded in the software Our major objective in writing this book is to transform the black box of the HCM intersection models and their software implementations into a clear box that allows the engineer to better understand how these models work We do this through the idea of the simplified scenario The eleven scenarios that we present are based on conditions greatly simplified from what you would normally see in the field By focusing on one concept at a time in the context of these simplified conditions you will better understand the fundamentals of the HCM intersection models You will then be able to apply these models to more complex intersections with skill confidence and insight **Guide for Pedestrian and Bicyclist Safety at Alternative and**

Other Intersections and Interchanges ,2020 Alternative Intersections and Interchanges A I I s are designs that improve operations and safety for motorized traffic by strategically adjusting the geometric features at a given location working on the general principle of redistributing motor vehicle demand at an intersection in an attempt to limit the need to add capacity with new lanes to improve traffic flow The TRB National Cooperative Highway Research Program's NCHRP Research Report 948 Guide for Pedestrian and Bicyclist Safety at Alternative and Other Intersections and Interchanges provides specific guidance for four common A I I s Diverging Diamond Interchange DDI Restricted Crossing U Turn RCUT Median U Turn MUT and Displaced Left Turn DLT These designs may involve reversing traffic lanes from their traditional directions which may introduce confusion and create safety issues for pedestrians and bicyclists In addition pedestrian paths and bicycle facilities may cross through islands or take different routes than expected These new designs are likely to require additional information for drivers bicyclists and pedestrians as well as better accommodations for pedestrians and bicyclists including pedestrians with disabilities
