Quality audit involves the systematic examination of a quality system. The Certified Quality Auditor is responsible for analyzing all elements of a quality system and judging its degree of adherence to the criteria of industrial management and quality evaluation and control systems. There is a new BOK with only minor changes which is to be effective after December 2012. Success factors in the CQA exam: 30% QUALITY CONCEPTS TOOLS 70% AUDIT PRACTICE. We are not talking about the percentage of questions here. We are talking about the success factor: the technical questions on quality management are easy to answer because they are mostly based on factual information. The audit practice questions are different; different answers work best in different scenarios under different conditions, i.e. how you will tackle a situation in a quality audit environment. There are also plenty of questions on concepts and theories. These are the questions quite closely related to the published objectives of the BOK. They mostly ask for the correct definitions of terms. For example, you will be tested heavily on the difference between First party internal audit, Second party external audit and Third party audit. You will also be tested on your understanding of the Deming principles. According to the ASQ, a Certified Six Sigma Black Belt is an individual who can explain Six Sigma philosophies and principles.
