## **Advanced Strategies Post Apocalyptic Story:**

Twenty-First Century Fiction S. Adiseshiah, R. Hildyard, 2015-12-04 This lively new volume of essays examines what happens now in 21st century fiction. Fresh theoretical approaches to writers such as Salman Rushdie, David Peace, Margaret Atwood and Hilary Mantel and identifications of 21st century themes, tropes and styles combine to produce a timely critical intervention into genuinely contemporary fiction.

**Game Design Workshop** Tracy Fullerton, 2008-02-08 Master the craft of game design so you can create that elusive combination of challenge, competition and interaction that players seek. This design workshop begins with an examination of the fundamental elements of game design, then puts you to work in prototyping, playtesting and redesigning your own games with exercises that teach essential design skills. Workshop exercises require no background in programming or artwork, releasing you from the intricacies of electronic game production so you can develop a working understanding of the essentials of game design.

Broadening Critical Boundaries in Children's and Young Adult Literature and Culture Amie A. Doughty, 2018-10-30 This collection of essays explores a wealth of topics in children's and young adult YA literature and culture. The contributions include an examination of the Watchbird cartoons by Munro Leaf and their attempts to teach morals and manners; an ethnographic study about the role of public youth librarians; and an exploration of the role popular video games can play in the secondary classroom. Other topics investigated here encompass the presentation of environmentalism in Hayao Miyazaki's films; psychological analyses and the role of race, gender and culture in children's and YA literature.

Reimagining Science Fiction Gary Westfahl, 2025-10-31 In the first decades of the twenty-first century, science fiction literature has been transformed in many ways as the genre has reacted to the dominating influence of films, television and video games; the growing popularity of fantasy; the rise of young adult science fiction and graphic novels; the impact of the internet and social media; and the increasing diversity of the authors, characters and often non-Western settings. The essays making up this volume address these and other changes in two ways. Some consider new critical approaches to science fiction in response to changing circumstances, including analyses of how evolutionary psychology explains today's science fiction; the emerging subgenre of cli fi; exploring the effects of climate change; the use of science fiction in different areas of the college curriculum; and a statistical method for identifying works of science fiction. Others examine significant new authors such as Nalo Hopkinson, Charles Stross, Paolo Bacigalupi, Suzanne Collins, Mira Grant, John Sandford and David Mura. Contributors include science fiction author Howard V. Hendrix and experts in the fields of Chinese studies, gender studies, literature, philosophy and religion.
