with a dark or dank cabin insufficient space for stowage or chartwork or sheet winches halyards and reefing arrangements so
inconvenient that you often find yourself motoring when you d rather be sailing Somewhere beneath your boat s crazed
gelcoat untamed rig patchwork electrical system and stubborn steering lies the boat of your dreams This book will enable
you to envision that boat in detail how its deck hardware is laid out what the rig looks like where its hull and decks are
reinforced and how its cabin arrangements are altered to fit your needs And the book will help you translate that vision into
reality by showing you what work should be done and in what order which projects you can do yourself and which you should
probably hire out and how much time or money might be involved Along the way Dan Spurr gives step by step instructions
supported by Bruce Bingham s beautifully clear drawings for many useful projects any do it yourselfer can tackle including
autopilot installation deck hardware modifications and electrical system upgrades The gear equipment design and
construction standards cited in this book often in very specific detail with brand name recommendations are as useful for
